

Forests around the World are under attack!

Changing goals and intention to humanity **Moneyaspects**

Nature is growing for several millions of years supporting us humans with all sorts of products.

Native people live in harmony with Nature. Civilised people are acting if they don't need Nature.

Beholding their bread would help them to understand quickly where fresh air, and also food, drinking water and a great diversity of other materials are coming from.

Nature, Mother Earth, is serving us. Society tried to make 'a new World' with a lot of side effects in damaging health, disturbing natural areas and more.

Native people have told us Western People for centuries that we need to understand money isn't usable to eat and; 'you can't buy Nature back with the money on your bank account when everything is gone'.

World wide we had big bushfires in 2020. Beside that a lot of countries still disturb Nature, chop down more trees instead of planting them. Make our World a sort of Hel with the result of the extinction of mankind..

Different studies and practical situations show us that Native People understand the Natural Earth principles and need protection of their knowledge and their land. Society disturbed the North American Indians, The tribes in Africa, The Aborigines in Australia, People in India, South America and more. All these cultures are disturbed/approached with the same intention and meaning; 'They don't understand so we will teach them'. Western society thinks they are better and; 'they need to listen'. Bad results.

Recent studies have shown how many goods were stolen from these countries in recent times and before. People Killed, Soil polluted, diamonds, and other raw materials, stolen, waters polluted. We need to change as society.

Some people around the World gave the Good examples. Protecting Native People, working on realisation of Natural areas, giving land back to the originated Native People.

Projects to support Can be found at: [Link](#)

The basic problem

[Money is the basic problem. Link](#) Profit, lack of knowledge, and no consciousness about the Natural values of Native people, Their land, traditions and respectfully accepting their way of living.

Not only does our Western based society disturb the health and future of these people, (only in America 60 Million Indians were killed!), we also destroy our own future.

People can live healthy in the nearby future and restore what's destroyed or continue and will continue working on human extinction. It's about your health. The future of our children.

It's like making the choice to go left or right. It's about human rights, it's about taking responsibility. It's about your and our future.

Human society made a sort of artificial world. Boundaries with lines on a map, buying land, contract owners, war against native people and some politics like earning money and pretending not to know what the consequences are.

Computer games, maps, online worlds, contracts, juristic papers and laws; we made an artificial World. Squatters, Gypsies, Homeless, people who want to live naturally, and more, only possible when you have money to buy a place to get Your Human Rights!

[We need a new law based respectful Nature and Human knowledge Link](#)

Only one thing is important to understand; Earth is dying because of these actions. So are we as humans and specific the Native people

Solutions are easy This is a call for action!

Because we made this artificial World which is in conflict with basic human rights, we need to help Native People to survive. To understand what's going on you saw the burning bushes in Brasil, Australia, Africa, Russia and more.

Governments don't realise 'their game' is over when Nature is done.

We need to buy the land in different places in the World to give it back to the Native people. It has many positive side effects. Restore Nature, Living places to Native people and cultures, Investing in some useful and futureproof initiatives and working on a World after money has gone. Because; **maybe you know; this money system will not stay for long.**

When you are looking to and want moral - respectful investments we offer you some great opportunities to start. They will give you a very good feeling, an act for the future, to serve the children in this World, to protect and let grow original knowledge and to give a direct signal for change. So we make, in this artificial World, places to restore Nature and Human existence. To make this World a better Place. **To serve Mother Nature/ Mother Earth, and to show above all something can be done.** To give life a new opportunity.

These projects are social profit. We invite you to help.

To make a real change in society and the future of humankind in general.

We ask you to understand that everything will be given to Nature, to the people of tomorrow, the children of today. Follow your hart and create the possibilities as long as your money has any value.. what will be a short time

More backgrounds and initiatives can be found at; www.ffrmnetwork.org

It's about a new Earth, about a new future. About another way of living, about your own Health. Do you understand?

- We also ask lawyers and other people to support this initiative for free. For example to do the paperwork

It's time to change. Right now!

Lets Make On This World A Better Place To All Living Creatures!

Lets Make a Real Healthy Future

Lets Understand Nature and Mother Earth and act as we know it should be

To survive and to show we are good stewards It's time to act!

It's about small amounts of money and support. So please, make this happen!

People, free people, need a place on a restored Earth. Let's make this happen!

It has nothing to do with money. But at this moment we need a sort of bridging a period in between to hold natural areas and native people, protectors to human kind in general.

Do you feel and understand the importance?

Every support, and from everybody, is welcome!
