Professional profile:

Experienced Front End Developer seeking new challenges

I am a versatile and committed web developer who have a couple of years of experience in implementing graphic layouts in content management systems - primarily Umbraco CMS. Add to that, 2 years of experience developing Single Page Applications using AngularJS and TypeScript with C # and MSSQL as backend technologies.

I am used to taking part in and contributing to smaller teams, all the while I am able to take responsibility for my own tasks solving them on my own hand.

My overall goal is to become a great full stack developer focusing on using JavaScript and C# / .Net.

Being curious by nature, eager to learn and able to easily learn new material, I find it exciting to enter new projects where I can further gain knowledge and experience with new technologies.

Experience:

August-2019 - January-2020	**Fullstack Developer**	**Active Window**

Active Window is a small company that focuses on providing interactive touchscreen solutions primarily to the tourist sector.

I am solely responsible for further developing the Active Window platform using hybrid app, frontend, backend and related technologies.

August-2017 - June-2019	**Frontend Developer**	**UVdata A/S**

UVdata has approx. 80 employees and was recently bought by KMD (approx. 3000 employees). UVdata mainly engage in developing administrative IT systems.

For practical reasons, I worked with and amongst KMD colleagues.

In my position at UVdata I developed new features in a complex SPA. The app is mainly aimed at caseworkers in Danish municipalities, childminders and parents with children in daycare.

August-2016 -
December 2016   **Frontend Developer   Pragmasoft A/S**
Pragmasoft had approx. 20 employees and engages in developing custom made IT solutions of different sizes.

At Pragmasoft I mainly solved minor/medium sized tasks using various front end-, back end- and database-technologies.

July-2013 -
July-2016   **Retraining**

June-2012 -
June-2013   **Frontend Developer   Økologisk Landsforening**
ØLF is an NGO with approx. 60 employees. ØLF engages in advocating for the use of more ecology in Denmark.

At ØLF I developed sub and campaign sites in Umbraco CMS. I also provided technical support for internal and external users of ØLF´s web site.

August-2010 -
April-2011   **Frontend Developer   CrossMind Reklamebureau**
Crossmind is an advertising agency with approx. 10 employees.

At Crossmind I developed web sites using Umbraco CMS. I was also responsible for handing over web sites and instructing customers in the use of their new sites.

July-2010   **Various unskilled and learned positions.**
Different unskilled positions mainly in construction and metal industry.

Education:

Bachelor in Web Development	2016 Erhvervsakademi, Viby J., DK
Multimedia Design	2006 Erhvervsakademi, Viby J., DK

Higher Preparatory Examination	1992 Gedved Statssem., Gedved, DK

Good knowledge of and comfortable in using Adobe Illustrator

More over; I also have experience in using Microsoft's and Google's office suites.

Languages:

Danish	Native proficiency
English	Full professional proficiency
Swedish	Limited working proficiency
German	Intermediate
Norwegian	Intermediate

Personal description:

I am 47 years old, single and I have no children.

I use my leisure time on various activities such as improving my coding skills and my apartment, outdoors life and bushcrafting.

I have been an avid motorcyclist often attending rallies and I have also gone on vacation on motorcycle several times. I would like to start riding an off road motorcycle again.

When the time comes to wind down I often do so with a good book, by watching some YouTube and Netflix or by playing some League of Legends.
