

## Ellen R Fisher

Divergent Science LLC

Co-Founder

*Fields of expertise: Science of Team Science*

Co-founder Dr. Ellen Fisher currently serves at the Vice President for Research (VPR) at the University of New Mexico. Ellen has a Ph.D. in chemistry from the University of Utah. She brings hands on and applied perspectives from over three decades of work on interdisciplinary science teams. Her background as a chemist, materials scientist, higher education administrator, and research integrity officer informs her research and practice with transdisciplinary scientific teams. Ellen has created numerous cross-disciplinary university programs to support interdisciplinary research, encourage ethical practices, create a culture of inclusion, and support women in science. She has published over 160 peer-reviewed articles spanning a diverse set of topics from laser spectroscopy to responsible conduct of research; 22 Ph.D. students and 8 masters students have completed their degrees under her guidance. Ellen has co-created interdisciplinary programs designed to enhance and promote team science culture at two R1 universities.

*In which project themes do you hope to participate?*

- Team Science Facilitation

*Favorite Marine Mammal?*
