

Final message PS: I send it in a video

Hey Ali, You probably didn't see the funnel strategy Stockmarketwolf your competitor uses that you could use for your "pip and dip crash course" in the video I sent you a week ago

The strategy can increase conversions for your higher ticket products so If you'd like to know more about the funnel strategy then just reply with Sure if not you wont receive follow ups from me any more

Improvements and implements he needs:

- Make a application funnel for his account flips room
- Make a lead funnel for his PIP AND DIP CRASH COURSE

Hey Ali, I loved your recent podcast clip of you guys talking about tradersfightleague cause I never knew that there was a fight league only for traders

And I wanted to let you know of a funnel strategy you could use to take advantage of your pip and dip crash course

It is to create what is called a lead funnel, where instead of giving the course for absolutely free, you trade the free course for peoples emails

It would be a good free gift to build your email list which then you can email to your list about your latest podcasts, events, and can sell them onto your higher ticket products

But I know you're probably a busy person to do that so I wanted to help by doing it for you

So if this is something you'd be interested in send me a sure and I'll get back shortly
