

**Department of Economics
Government Champhai College
Field Visit & Social Work**

The Department of Economics, Govt. Champhai College organized one-day field visit and social work on 5th April, 2022. 6th semester students and 4 faculties visited the office of District Research officer, Department of Economics & Statistics, Champhai District located at Keifangtlang, Champhai.

The District Research Officer was unavailable for the day but senior most Inspector, Mr. Lalhmangaiha received the students and faculties with a warm welcome. He gave advice to the students regarding their duties as students and what awaits them in the real world. He said that they should work hard to become successful. He also communicated to the student's various exams they could write as Economics graduate. It was quite a successful visit.

After this visit, the program continued at North Khawbung village in Champhai district. According to 2011 census, North Khawbung has 178 households. Currently, there are around 300 households. There are beautiful parks and recreation centres in the village. Many youngsters would visit these places and leave garbage behind. So, the department felt that cleaning at least one of these parks as part of social work would be beneficial for the department as well as the village concerned.

So, on the afternoon of 12th April, 2022, the students of 6th semester and 4 faculties visited North Khawbung village and cleaned the park. After the work was carried out, it was followed by dinner at the park.
