

So you want to play with Striker on Project Playtime?

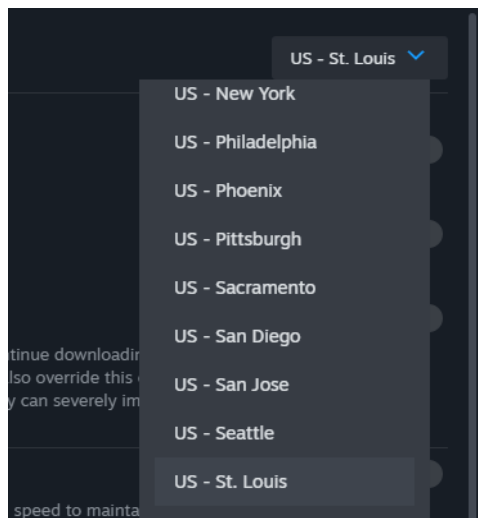

Follow these simple steps.

1. Install project playtime but make sure its closed

2. Go to Steam > Settings > Downloads

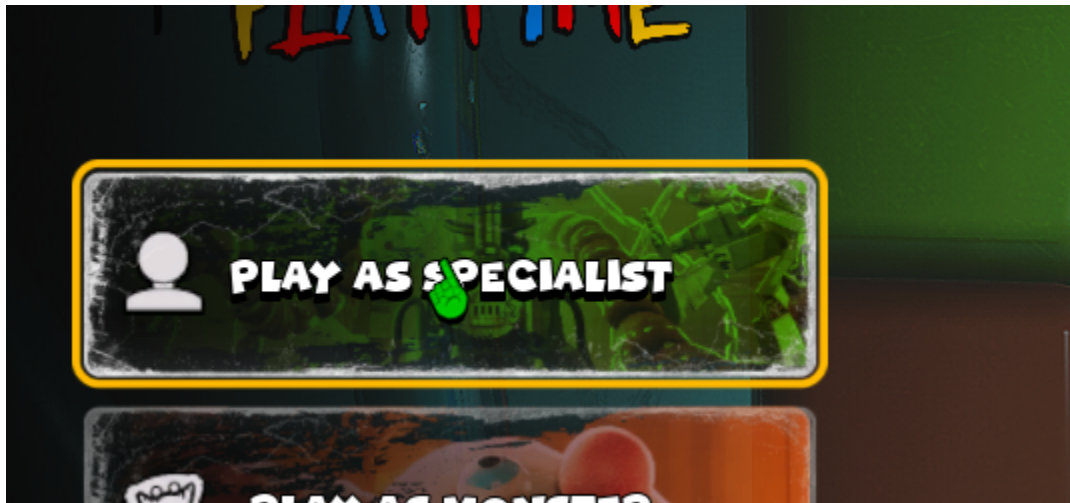

3. Change Download region to “US - St. Louis”

(recommend you change it back to what it originally was after the stream)

4. Open project playtime and wait for Striker to be back in the lobby

5. When he is ready, click “specialist” and wait for him to say ready up

6. When striker types ready up in the live chat, press “Find Match” as fast as you can! (hope it works)

With these steps you should be golden!
