

# Quality Component Design Checklist

*Created by the Lyft Design Systems Team*

## Research

- ✓ Company Brand Guidelines
- ✓ Material Design & Apple HIG equivalent component
- ✓ Asked UX Research about similar elements being tested
- ✓ Audit all current designs & potential usages
- ✓ Name & root problem agreement between design & engineering

## Hierarchy

- ✓ Accessible colors from brand spectrum
- ✓ Legible type from branded type set
- ✓ Elevation used sparingly from brand set
- ✓ Offer multiple sizes, if necessary
- ✓ Flexibility in color, type, elevation and size determined

## Structure

- ✓ Branded shape/corners
- ✓ A like-shape (not the same) as other components
- ✓ Base size determined by relationship to tap target & base unit of 8
- ✓ Uses spacers and/or alignment guides for constraint layout
- ✓ Determine what happens to text when it gets too long: truncation, wrapping, etc.

## Interactivity

- ✓ All required states (default, touch down, disabled, loading, etc)
- ✓ Curves and duration for enter, exit, and state change animations

## Test & Document

- ✓ Tested component in the screens from the audit
- ✓ Documented research, hierarchy, structure, interactivity and intended usage
