

## Video Tutor - Production and Voice Acting (Active)

Number of Positions	Job Category	Posted Date	Location
5	Video Production	Ongoing	Remote

### More information about this job

---

#### Job Description:

#### **Calling all medical/anatomy/histology -related people with passion for video production!**

Do you have a background in anatomy and/or histology? Do you have experience and equipment for video production? Do you have a great voice? Are you looking for at least 20 hours of work per week?

We are looking for candidates with video production skills to work as our video tutors. You would be the voice behind our video tutorials. Working from home, you will be producing videos in anatomy and/or histology topics.

Join us in the crusade to revolutionise medical education - making anatomy fun, efficient and easy, accessed anywhere, anytime.

#### Skills/Requirements:

- Has a Mac computer
- Has recording settings which produce great quality sound
- Background in anatomy and/or histology (completed at least 1 anatomy and/or 1 histology subject in related degree)
- Ability to commit at least 20 hours per week
- Passion for anatomy and teaching with great energy and engaging voice

#### Our Ideal Candidate:

**Is able to work independently and thrives by achieving set goals** Once you are confident in what you need to do, you can run with it and don't need a lot of direction. You are able to succinctly report your progress on a weekly basis. You are outcome-oriented and get a buzz from achieving your goals. That said, you are not on an island. You'll get help and support from the team and be part of our Kenhub family.

**Is an exceptional communicator** You know how to speak up about your ideas, concerns and suggestions. You don't take offense to constructive feedback and understand not to take things personally. You are efficient and smooth in your conversations.

**Is creative, driven and action-oriented** You're ambitious and you get things done. You're a do-er and a go-getter. When you see potential for things to improve, you think outside the box.

**Is a believer of technology driven education** You are dying to see medical education move forward in its method of teaching to catch up to today's technology. You relate to the pain and sorrow of carrying textbooks that makes studying confined to a desk. You understand that for students, they have little time to spare and every minute counts.

**Is fun and easy-going** As our team works remotely from each other, it is important for you to be open and to not take things too seriously. You're chilled like chilli bin in stressful situations yet still laser-focussed on your tasks. You don't have to be a joke master (these positions are highly competitive at Kenhub) but you know how to have a good laugh.

## How to apply

---

Sign up and check out our videos: <https://www.kenhub.com>

Tell us in your cover letter how you are our ideal candidate, what about Kenhub appeals to you, your background in video production, anatomy and/or histology.

Create a short video (minimum 1 minute long) covering a topic in anatomy or histology. Pick your favorite presentation from <http://www.slideshare.net/>, record a short sample and send it to us via Dropbox or Wetransfer in .mov or .mp4 formats. Please do not add the video to Youtube, as this may generate a copyright issue. We want to have a chance to see how engaging and comfortable you are with recording and editing video tutorials.

Send your CV, Cover Letter and link to your sample work to [student.jobs@kenhub.com](mailto:student.jobs@kenhub.com) quoting reference number **KHSJ 00 VT** .

Feel free to contact us if you have any questions. We don't bite, we are a friendly bunch.
