

## Alethria Kochbalth Luxra

### Kenai Peninsula wolf (*Canis lupus alces*)

#### Personality:

Will add later, just wanted to finish.

#### Visual Description:

##### Shape

##### -Gigantism mutation

Alethria is absolutely towering amongst her pack. Weighing at 224 lbs, she reaches about 44 inches (3.75 feet) at the shoulder, and a bit over 2 meters in length, her size alone makes her an intimidating figure. Her body is sturdy and imposing. Her overall muscularity is decent. Her fur is very thick during the winter, while only partially in the summer. She sheds heavily during spring.

##### Coloration

Alethria is a primarily dark brown wolf with black points. Her most defined marking is the black mask that covers her face. She has light tan and black ticking with a small tan side stripe.
