

Athina Karvounaraki

Athina studied at Athens University of Economics and Business (BSc in Statistics) and the University of Bath, UK (MSc in Computational statistics). She has been working for the European Commission for more than 20 years in various positions, always related to statistics, indicators, and data analysis. Since 2019, she has been the Team Leader in Statistics and Indicators at the Chief Economist Unit of DG Research and Innovation and project officer for the European and Regional Innovation Scoreboards. Athina and her team support the production and analysis of quantitative evidence for the contribution of research and innovation to the Commission's policies. She has co-authored various EU reports and working papers and is on the drafting team of the biennial flagship report Science Research and Innovation Performance of the EU.
