

WHAT ARE EXCHANGE ITEMS?

Exchange items are loot drops you get by killing monsters, opening bags and leftovers from cooking/alchemy. You will always earn more silver by handing them in to the Exchange NPC instead of just selling them to a vendor. Exchange NPCs may give you sums of silver, profession experience, Black Stones, equipment, etc. To find where to hand in any exchange item, you can right-click the item in your inventory and then click "NPC Location". This will show you a route on your map to the closest NPC. It will show the point of the other NPCs on the map with a light beam, but will not set a route to them.
