

Each year the Lemont High School Art Department & The Woods Technology Department teams up and creates large wooden letters for each academic department at LHS. This year we are creating the word SCIENCE. The art students paint images on the letters that represent that field. The art department will use some of these ideas and paint them onto the letters. The letters will be hung in one of the science hallways. Below are examples of the three academic departments we have created to this point. On the templates that spell out SCIENCE provided below, draw images that represent science. Have fun creating.

SCIENCE

Font of the SCIENCE letters is Impact
