

React with Typescript

<https://tailwindcss.com/docs/installation>

<https://coolors.co/>

miro board link: https://miro.com/app/board/uXjVPNRFJ3A=?share_link_id=691362996509

TO-DO LIST

- ☐ more design ideas for mobile form page
- ☐ add color palettes and vote for your favorite two
- ☐ Lee: setup code infrastructure; routing + base pages
 - ☐ API CALLS
 - ☐ DB management? MySQL
 - ☐ Trpc?
 - ☐ Prisma?
- ☐ lindsey: create a more thorough paper prototype, send to lee for verification, afterwards make clickable
 - ☒ ~~create user flow draft~~
- ☐ hire backend dev (ask steph?)

color palettes

- <https://coolors.co/e5f4e3-5da9e9-003f91-ffffff-6d326d> (minus first color)
-

Don't need in the barebones prototype

other features

- about section on landing page
- Dark / light mode toggle
 - depends on your system settings, can be in settings/header
- login/signup page
- mini dashboard to see all events created
 - see events currently participating in
- not sure how to create an event anonymously...

form page

- calendar and times side-by-side comparison is good
- can go to next month w arrows, can continue to save dates
- default 9-5pm, change to 8am-8pm as default
- How long the specific event is: 3 hours or 5 hours, etc → select dropdown
- How many times they would like to meet for the specific date range → number field thingy with inc / dec buttons
- design ideas for filling out availability:
 - event name field at the top

- calendar section, scroll through upcoming months
- like the dragging to create availabilities, but problem is that can be too small
- autofill
 - fill out availability for one day, autofill toggle to fill out the same entries the other days
 - problem: if days alter slightly then still have to manually do it
- need more ideas

event page

- States: draft state, published state
- notes section, “what we need to learn by certain practice”, etc., on top of calendar
- Draft
 - like the on-hover effect to see who else is available
 - like to see real time your availability sync w group availability
- Published
 - creator should be able to publish event, section with “these are the best available times” maybe on the top of the page
 - Write AI code
 - Publish event → can send email to participants that event is finalized, participants can opt out of email notifications as well
 - Share button / icon will just copy link, copy to clipboard
 - Button to add google calendar, ios calendar

dashboard page (when you log in)

- Number of total events
- Number of upcoming
- Create an event btn on header

Footer

- Our names, links to our linkedin + website
- From 2022-on ward

DB SCHEMA
