THE POSSIBLE REASONS FOR THE SILVER TO DARKEN:

.01

Wet air. Do not store the items near any moisture sources, such as in the bathroom. Put a piece of soft fabric in a jewelry box and place your jewelry there to avoid excessive humidity effects.

.02

Contacts with different substances can cause the darkening of silver. Take off your jewelry when doing household chores such as dishwashing, cleaning, or cooking.

.03

When in contact with sulfur compounds, silver items are quickly covered with dark plaque. This can happen at home when you work with onions, salt, or egg yolk.

.04

Sometimes silver jewelry can get darker when its owner gets sick. And also because of certain properties of human skin.

HOW TO TAKE CARE OF YOUR SILVER JEWELRY:

.01

Store the items separately from each other to avoid scratching. For this purpose, use the special jewelry boxes with multiple compartments inside.

.02

Try using special reusable napkins to clean your silver jewelry. Wipe the product thoroughly to remove any plaque.

.03

If the darkening process is already too severe, use a special silver cleaning fluid. Be careful using it if your jewelry includes precious stones, as this fluid can cause damage to them.

.04

Ammonia solution can also help eliminate plaque. Add 1 gram of ammonia to 100 grams of water and leave the silver ornament in the solution for 15-20 minutes. Then rinse the product thoroughly in running water and wipe with a soft cloth.

FOR THE DEMO VERSION OF THE WEBSITE, WE HAVE USED THE CONTENT PROVIDED BY STARINSKY JWS BRAND.

A nice married couple who founded Starinsky comes up with the designs for their own products and produce them by hand. The main direction they work in is minimalism.

STARINSKYJEWELRY.COM

Starinsky's founders believe that jewelry should be simple and concise, so that not to make your look overwhelming but rather to emphasize it in a subtle way.

Besides their basic collection, Starinsky brand also produces custom-made wedding rings, placing emphasis on individual approach, high quality, and ergonomics of the end product.
