

6.5 Clinical Practice Handbook- Narrative

During the fall SCP Program Orientation Candidates are informed of conditions for admissions and credentialing, expectations for clinical experience including appropriate placements and professional/ethical behavior, and clinical practice assessments. Further, supports for academic and professional challenges are provided. These key points are summarized in the Program Handbook and a checklist of required candidate documents are required.

During the Supervisor Orientation in the fall, supervisors receive information about appropriate placements (including requirements for supervisors, supervision, and district resources), expectations for clinical experience, candidates' field-based evaluation, and veteran practitioner support.
