2. What Is Retainer AI?

Building an AI-powered service business can be incredibly valuable — but creating the technology, managing clients, delivering consistent support, and scaling operations can quickly become complicated.

RetainerAI removes that complexity. It lets you launch your own branded AI-powered operator business and serve subscription-based clients from one powerful platform.

Your AI-powered operator can deliver real-time assistance, smart analysis, and ongoing client support — helping you provide continuous value without building complex technology from scratch or relying on a large team.

Instead of offering one-off services or manually handling every client interaction, you can create a scalable, subscription-based business designed to support clients on an ongoing basis.

The core promise for the buyer: launch your own branded AI-powered operator business, deliver real-time assistance and ongoing value to subscription clients, and build predictable recurring revenue — all from one powerful platform.
