

This year in grade 3 I decided to track Reading, Writing, and Math goals as well as SEL goals for students on Flipgrid . Students conferenced with their parents and myself this week and developed goals based on their BOY data. The goals were student driven and parents were asked to fill out a survey after they viewed their child's flipgrid about how they felt about their goals for the school year. Parents are also able to respond to their child on their progress through the year on their grid. Student and parents will revisit grid in January and the end of the year to monitor goals and modify if needed. So far the surveys coming back are very positive about this process and parents are very happy students are taking ownership of their learning and goal setting individually based on their needs.

Gr 3 Ss are getting ready on @flipgrid @HughColeBWRSD for student led conferences. Having Ss take ownership of their learning, creating sharp and clearly defined measureable goals, will allow them to take pride in their accomplishments this year @giroux_cindy @reneeannreis @BWRSD
