# How to add TERGO token to your wallet:

NNS

1. Go to https://nns.ic0.app/ and click the button "Sign in with Internet Identity" to sign in.

2.a. After a bow step you should be redirected to Internet Identity website (https://identity.ic0.app/#authorize). If you are on this website click "Create Internet Identity" (If you already have Internet Identity do to step 2.b)

3.a. Clicking on this button will trigger generation of your local Internet Identity represented by a secret key that is securely stored on your device in encrypted form. Your crypto assets are as secure as your Internet Identity. Never reveal it to anyone.

Click on this pop up to create your identity. After that you may be asked to set a pin that will let you use your identity when you need it.
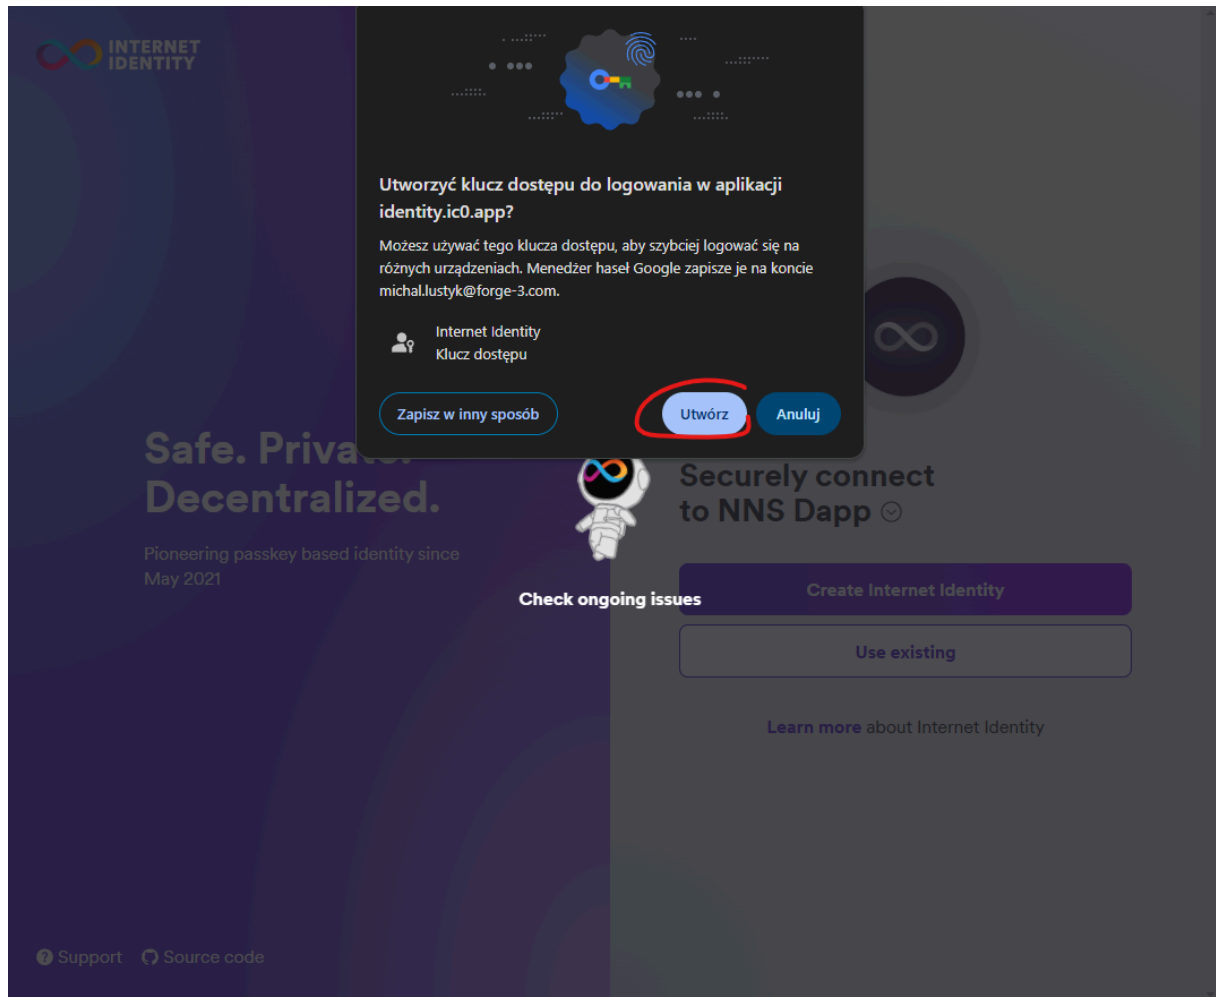

4.a. You should be redirected to this website that keeps your internet identity id. Do everything as documentation on the website says. If you saved your number in secure plate click "
I saved it, continue"
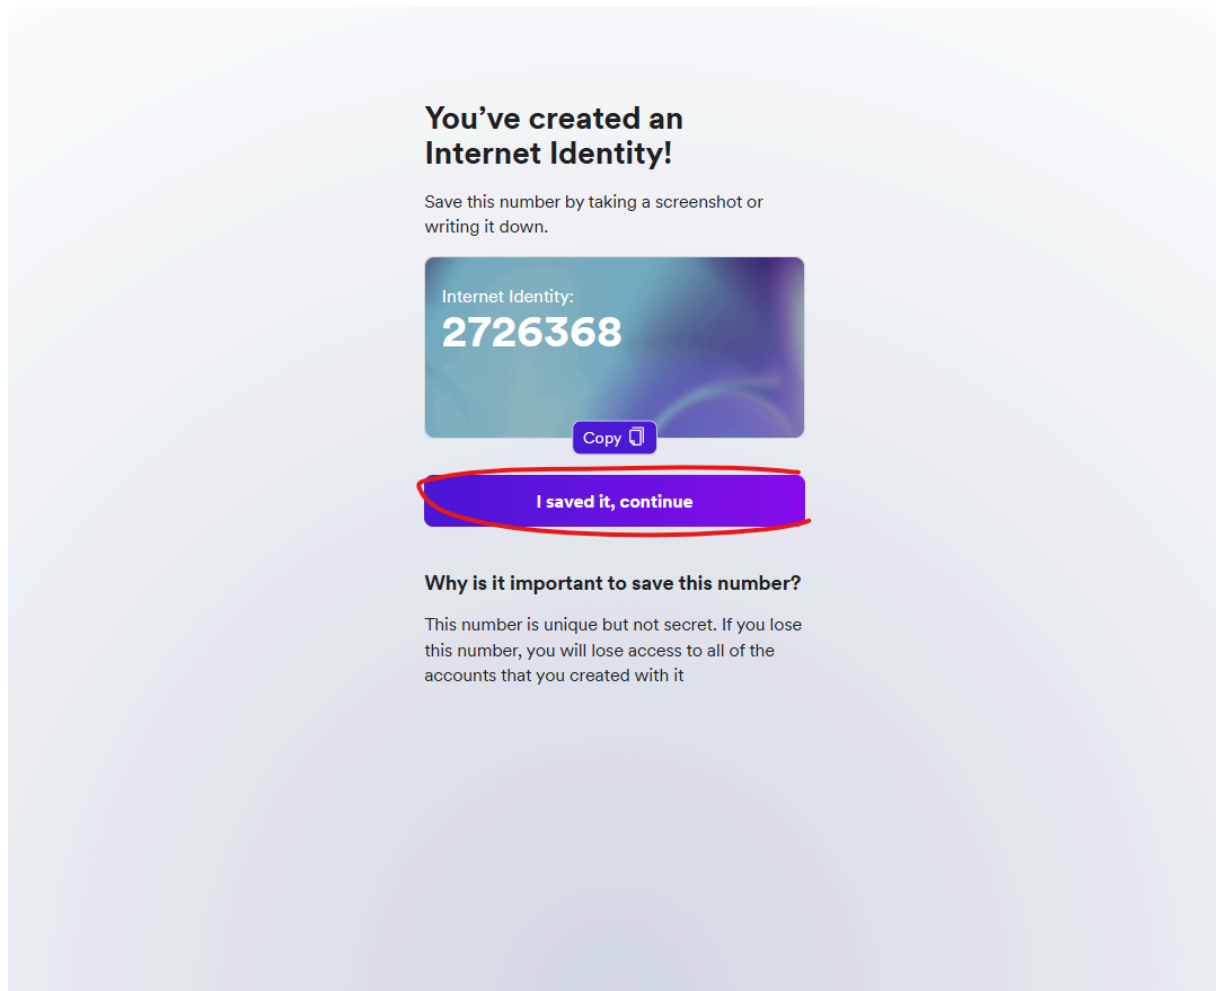

2.b. After a bow step you should be redirected to Internet Identity website (https://identity.ic0.app/#authorize). If you are on this website click on identity ID that you would like to use (If you do not have Internet Identity go to step 2.1)
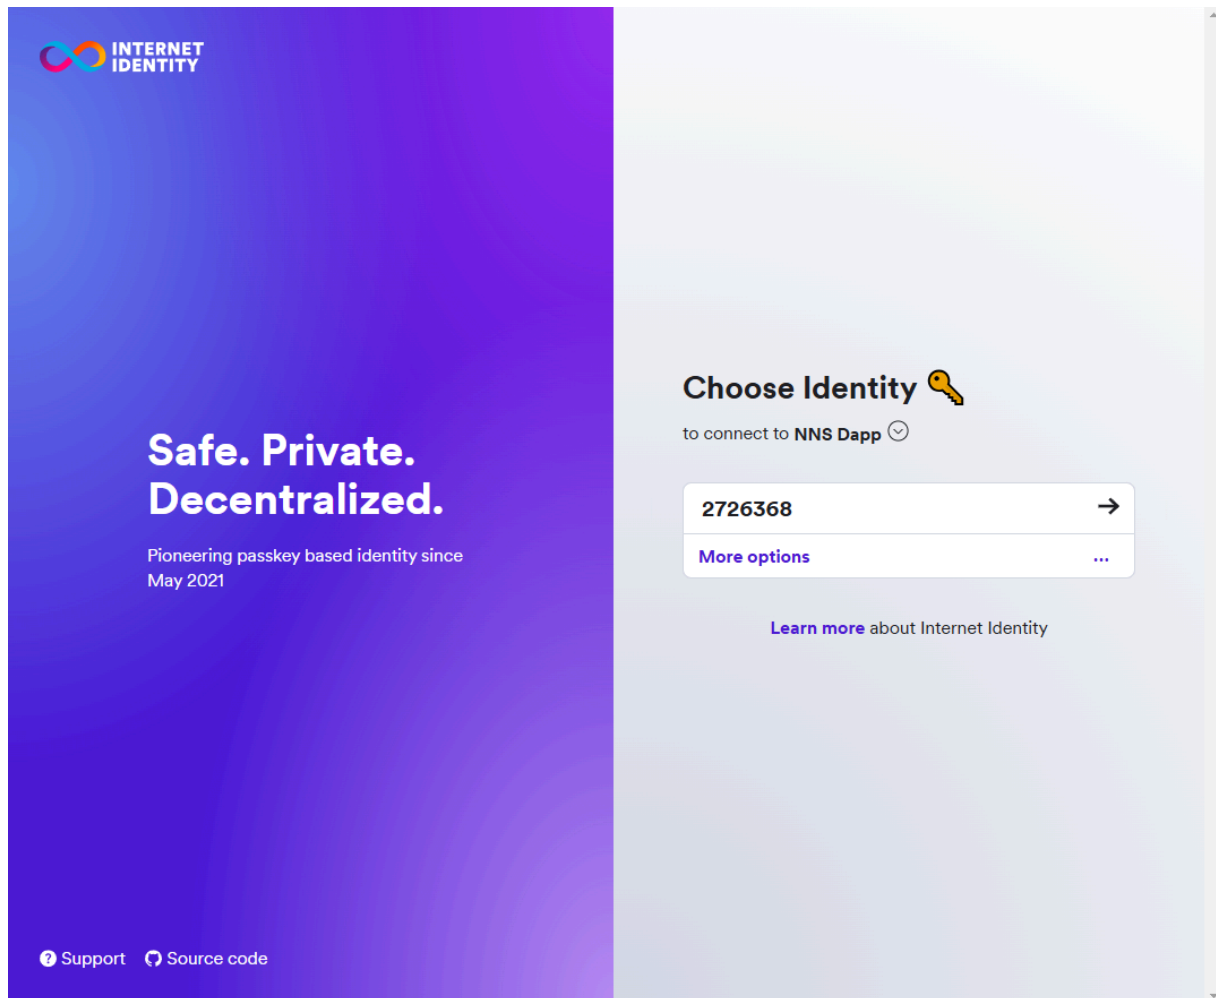

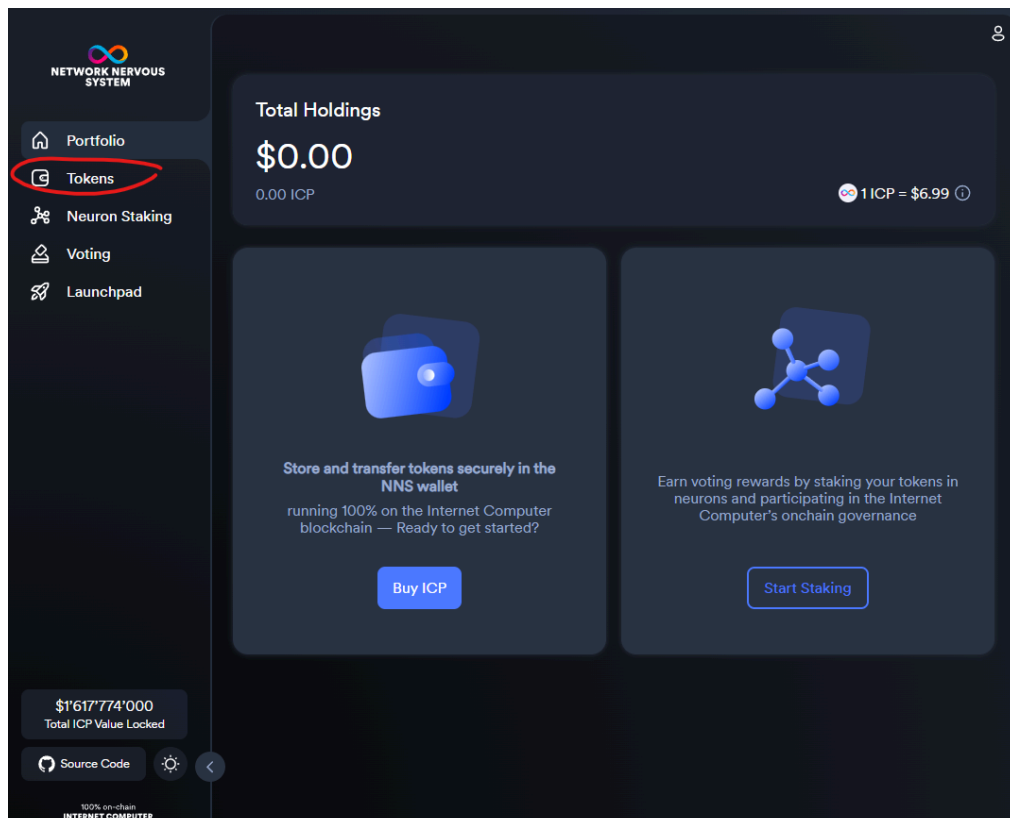

3.b. Continue logging in by decrypting your identity. Click "Continue" (Go to step 5)
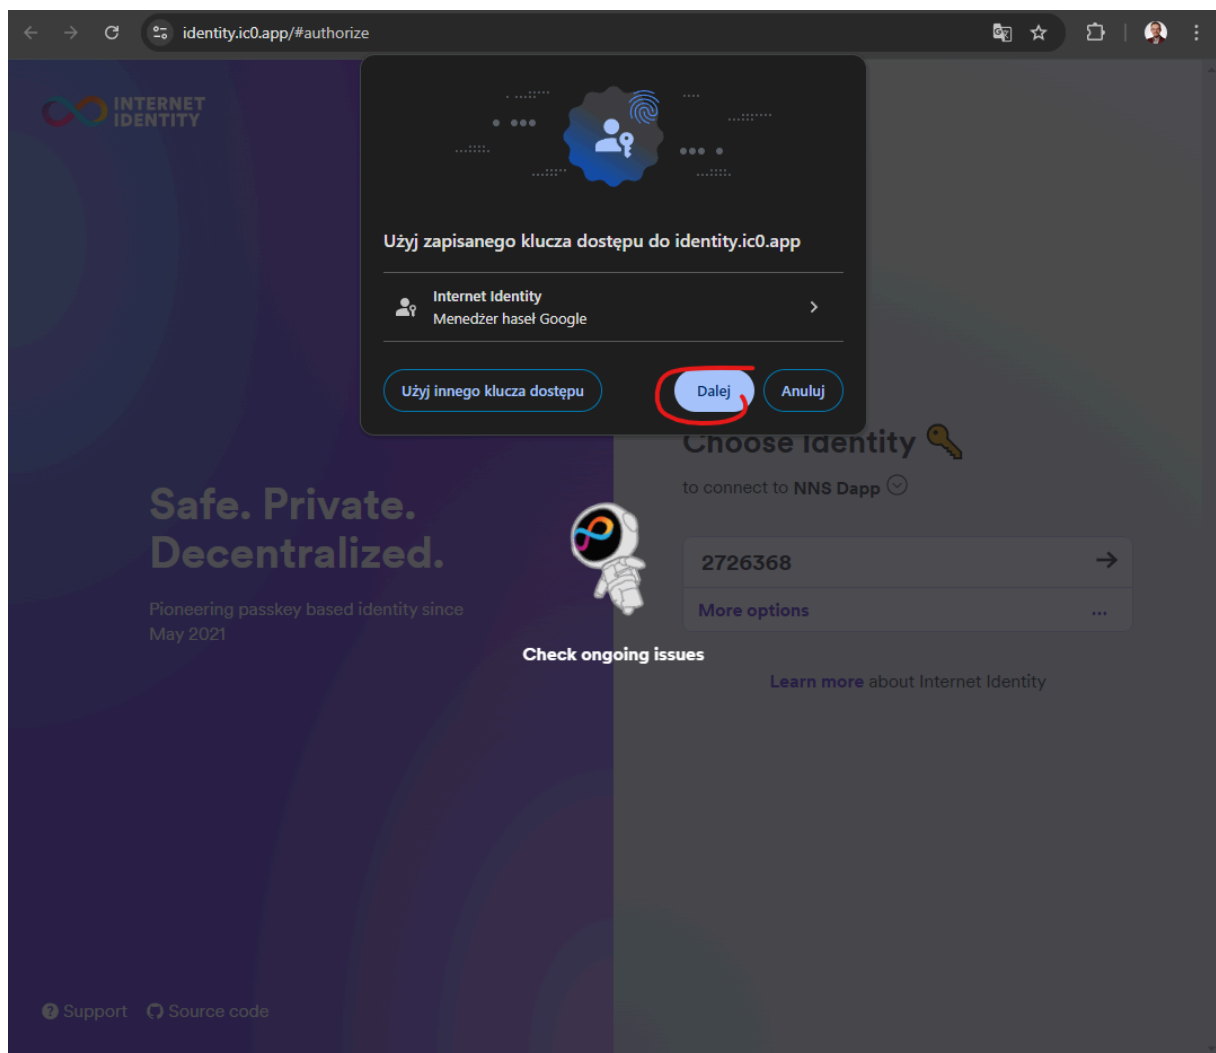

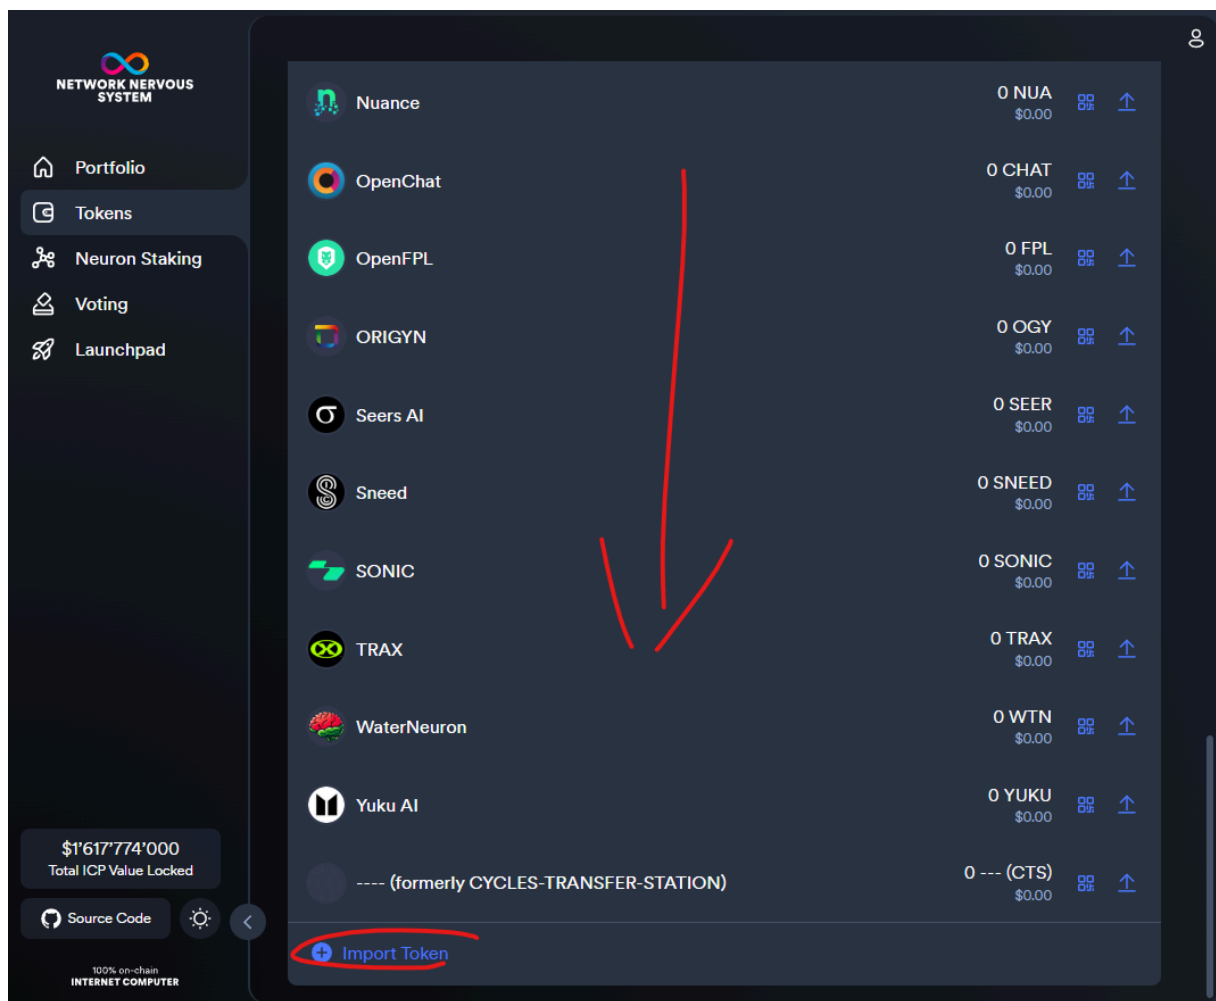

5. After that you should be logged in to your wallet
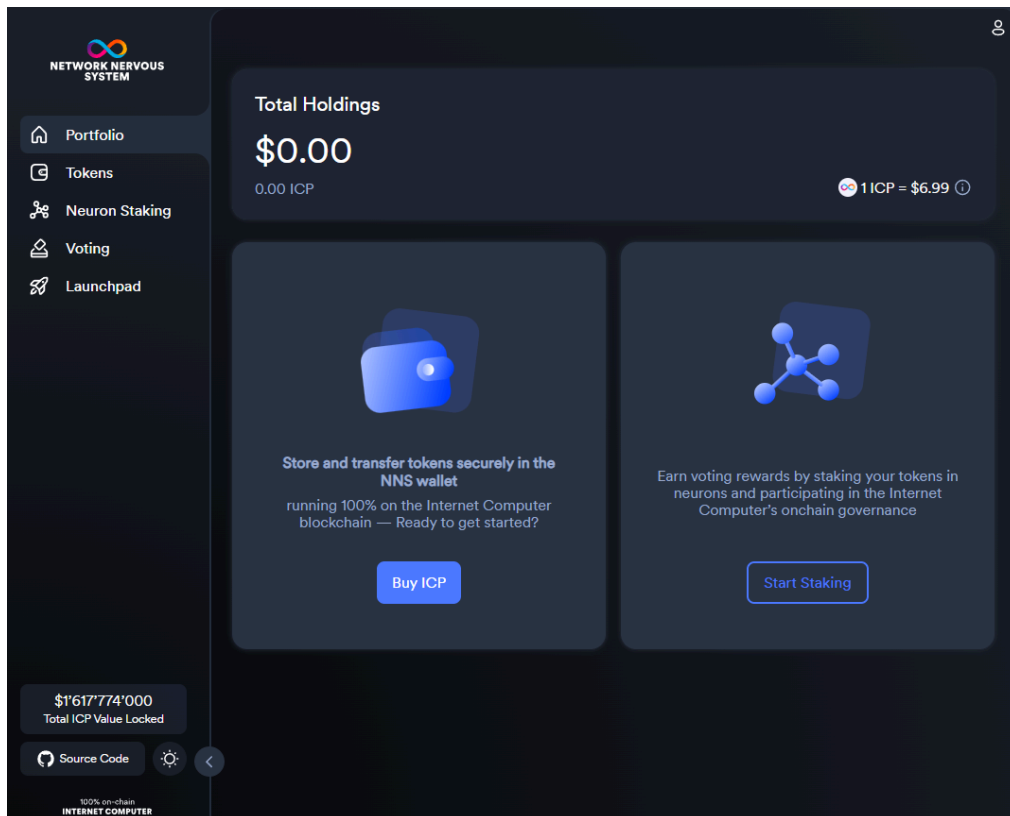

6. Go to "Tokens" tab

7. Scroll down and click button "Import Token"

8. After that add a token to your wallet. Fill inputs as follow:

- Ledger Canister ID - sbf7t-3iaaa-aaaah-araiq-cai

- Index Canister ID - sigup-naaaa-aaaah-araja-cai

After filling inputs click button „Next"

9. This screen may be a little bit different if you fill everything correctly. Click the "Import" to go forward.
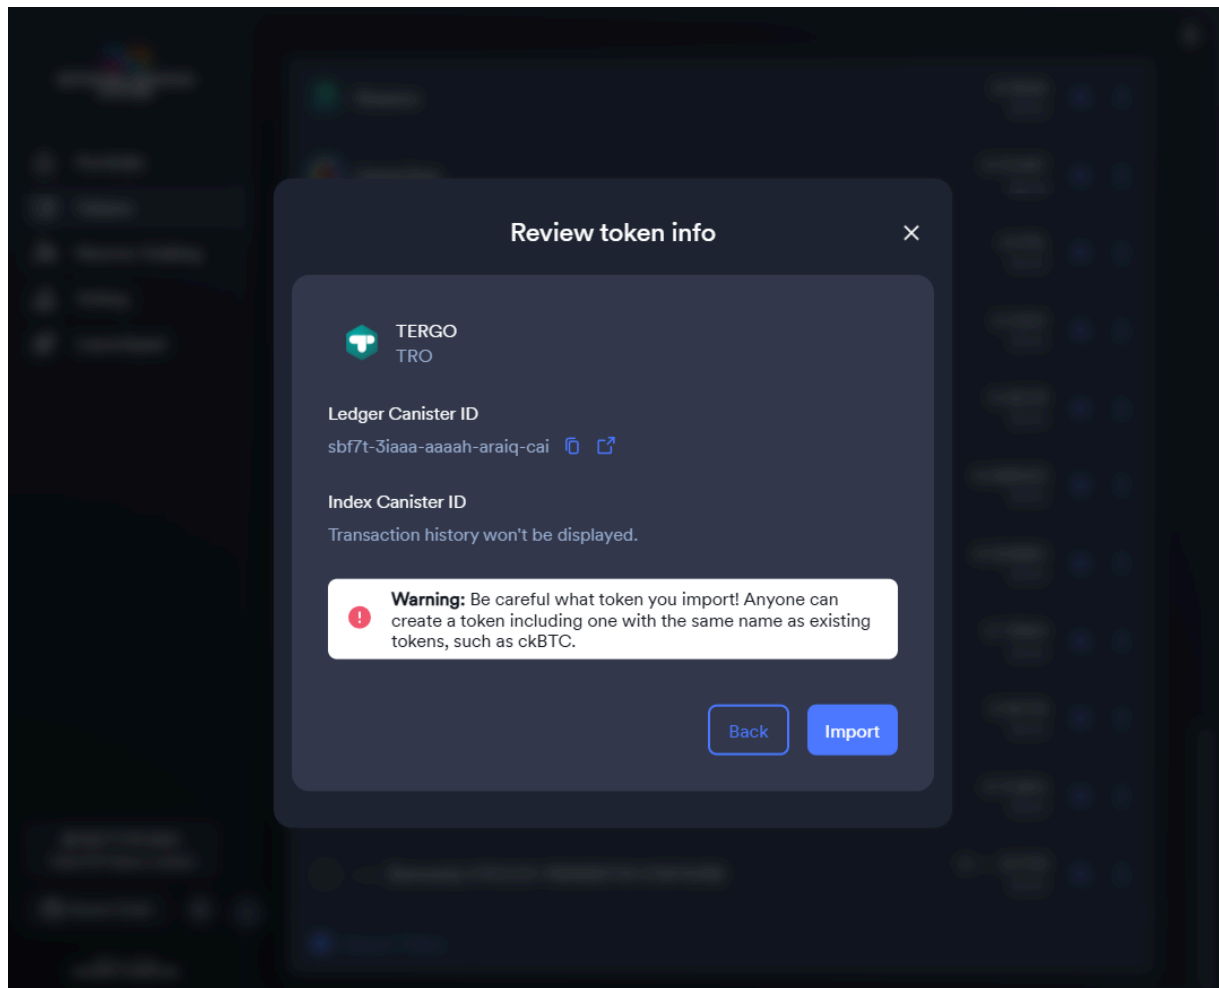

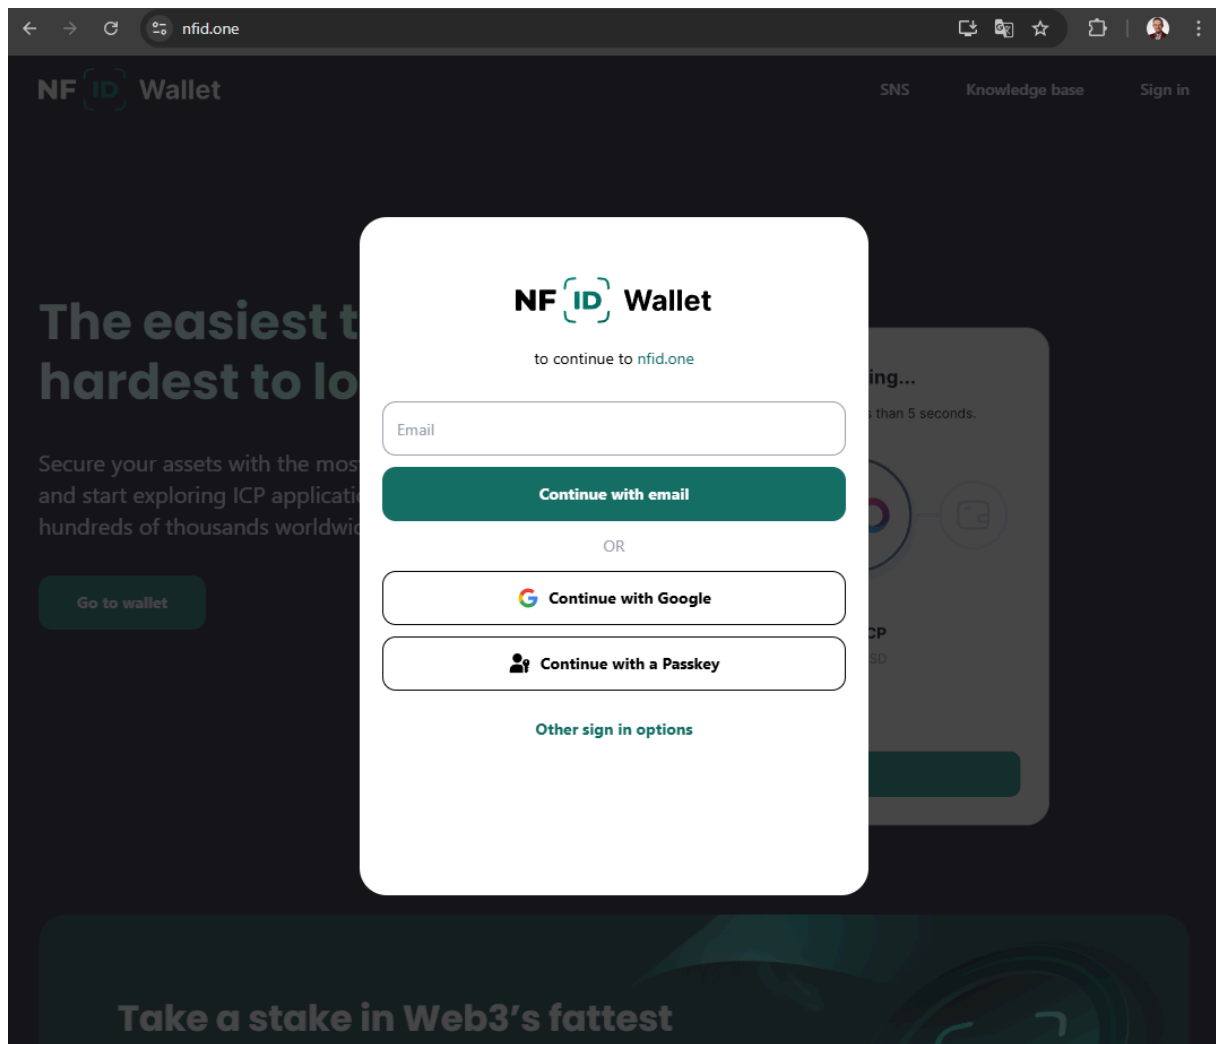

NFID

1. Go to https://nfid.one/ and click the button one from corresponding buttons:

- ● Continue with email
- ● Continue with Google
- ● Continue with a Passkey

Choose one from the options and follow the instructions.

2. After you will be logged in you will be redirected to the dashboard of your wallet where you will be able to add a TERGO token to your wallet, By clicking the "Manage tokens".

3. After that you will see a popup that allows you to manage your tokens. Click in here button called "Import"
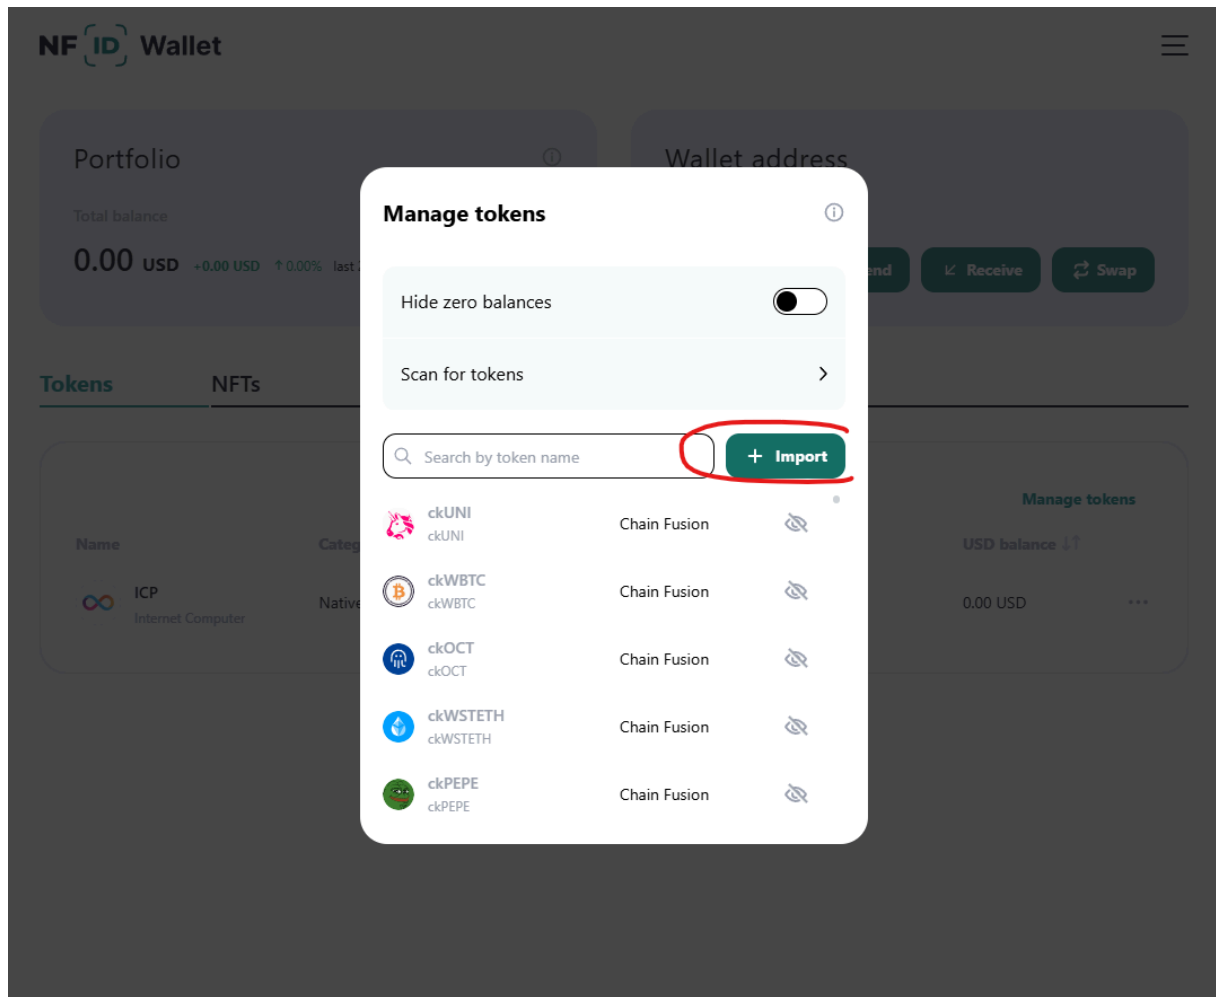

4. Add a token to your wallet by filling inputs as follow:

- Ledger Canister ID - sbf7t-3iaaa-aaaah-araiq-cai

- Index Canister ID - sigup-naaaa-aaaah-araja-cai

After filling inputs click the button „Import custom token".
