Good Morning!

On **Thursday, April 3**, all Juniors will take the SAT. The following is important information for you to help your Junior prepare for this important test.

Here is a link to the [Test Day Schedule](#) and an important [video](#) that outlines what will be on the test and how to prepare.

1. Parent Guide - This official [SAT Parent/Guardian's Guide](#) contains answers to frequently asked questions.

2. Student Guide - Please review the following official [SAT School Day Student Guide](#) with your student. Beginning at the top of Page 9 you will find important information on helping them prepare for the test.

3. Get Familiar with the BlueBook App - Your student's school-issued Chromebooks are already equipped with the [BlueBook App](#), which they'll use for the SAT. Please encourage them to spend some time exploring the app by reviewing the resources it offers and taking the practice test. This will help them get comfortable with the digital format before the actual test.

4. Fully Charged Chromebook & Power Cord - Please have your student fully charge their Chromebook the night before the test. Additionally, they should bring their power cord, as they may need it if their battery runs low. This will help ensure a smooth testing experience.

5. A Good Night's Sleep - A good night's rest is essential for optimal academic performance. Please encourage your student to get plenty of sleep the night before the test so that they're focused and alert.

6. Eat a Healthy Breakfast - We encourage everyone to start the day with a nutritious meal. Eating well will give your student the energy to stay focused during the test.

7. Arrive on Time - All students must arrive at school on time. **Testing will begin promptly at 8:04** and late arrivals will not be admitted once the exam has begun.

8. What to Bring - Along with their fully charged Chromebook and power cord, your student may want to bring a water bottle and a few snacks to keep them energized during breaks. We will provide hand held calculators for those who would like to use them. They do not need to bring their own.

9. What Not to Bring - **To maintain a quiet and focused testing environment, students should leave all smart devices such as cell phones, smartwatches, and headphones (including earbuds) at home or stored securely and powered off in their backpacks. These items are not permitted in the testing room.**

Remember, [your student's SAT scores matter](#), not just to them but to the entire KHS community. The SAT provides students and the school with important data, and doing well can be a huge benefit and confidence boost for all of us. In fact, their serious effort and achievement reflects well on KHS as a whole.

We are excited to provide our students with this opportunity to show what they know and can do. As they prepare, please don't hesitate to reach out with questions.

David Coleman
Dean of Students 11 & 12
Kennett High School
