

eCoverly Review

When I first heard about this new eCover design tool called eCoverly, I'll admit I was pretty skeptical. I mean, how many more cover creators do we really need in this oversaturated market? And are they even worth the investment?

[In a hurry? 🤔 Get the best deal on eCoverly here ↩️](#)

The only reason I decided to try out eCoverly was because of one truly unique feature I hadn't seen anywhere else yet (especially not at this price point) - animated eBook covers.

eCoverly is a brand new tool that lets you pump out professional, eye-catching ANIMATED covers in mere seconds. We're talking **animated eBook** covers, report covers, podcast covers - you name the digital product, eCoverly can animate a cover for it lickety split.

But I had so many questions before taking the plunge...

Are animated covers really worth it?

Can they actually help boost sales?

Is eCoverly a smart buy or just hype?

Well after testing it out myself, I'm ready to spill all the tea in this candid [eCoverly review](#).

Let's dive in and find out exactly what this puppy can (and can't) do, shall we?

Here's What eCoverly Is All About

In a nutshell, eCoverly is an eCover creator built to pump out animated covers for eBooks, reports, podcasts, online courses - you name it.

Now you're probably thinking - animated covers are just a gimmick, right?

Well, not so fast. Big time authors like Tim Ferriss and major publishers like HarperCollins are now using animated covers to stand out.

eCoverly Members Area

And for good reason - with SO much competition and clutter out there, you need every edge you can get. An animated cover can instantly grab attention and pull readers in.

But here's the problem - creating these suckers usually requires complex tools like Adobe After Effects. Or you could pay a designer \$50, \$100, even \$200+ per cover.

eCoverly smashes this problem by **making animated** cover design stupid simple, with:

A Drag & Drop Editor Even My Grandma Could Figure Out

Seriously, the editor in eCoverly is so easy my cat could make a cover (although he'd probably just fill it with tuna fish pics).

[It's all point, click and drag - add images, stylize fonts, and tweak it all with just a few clicks.](#)

40+ Animated Templates to Jumpstart Your Designs

No need to start from a blank slate - eCoverly comes loaded with 40+ animated templates for any niche. Just swap in your own graphics and texts for a unique animated cover in under 5 minutes.

Tons of Customization Options

The templates are just the starting point. You can customize covers further with 100s of fonts, an image library, filters, color overlays, shadows, and more.

Built-In Image Editor

Don't have the perfect image for your cover? No prob! [eCoverly has image](#) editing tools built right in to crop, resize, adjust, and optimize images for your animated covers.

Music Player

You can even listen to upbeat tunes right inside eCoverly to get those creative juices flowing while you design covers.

Client Sharing Portal

Once your cover is client-ready, you can share it and collaborate directly in the eCoverly dashboard. No more messy email attachments and Dropbox links!

eCoverly also lets you pump out static eBook covers, with 250+ templates and tons of custom product models like books, boxes, CDs, laptops, tablets, and more.

But the real magic lies in the animated covers. Just take a look at these beauties I whipped up in under 5 minutes:

Covers like these would cost you an arm and a leg on Fiverr or Upwork. But with eCoverly you can create similar professional animated [covers at lightning speed!](#)

My Verdict After Testing eCoverly

So what's the final verdict - is eCoverly worth it or just hype? Here are my thoughts after taking it for a spin...

What I Didn't Love

Some static templates do look a bit cookie-cutter and dated

What I Liked

Animated covers are slick, modern, and catch the eye
Super easy drag and drop editor
Tons of customization options
What I LOVED

Create beautiful animated covers in under 5 minutes

Easy client sharing and collaboration

Way more affordable than hiring a designer

The Bottom Line...

eCoverly makes it stupid simple for anyone to [create animated eBook](#) covers and other digital product covers that grab attention and look legit professional.

While the static templates are just okay, the real magic here lies in the animated cover capabilities. In just minutes, you can animate an eCover that commands attention and boosts sales.

For bootstrapped authors, bloggers, coaches, and consultants, eCoverly is a no-brainer for creating covers without breaking the bank.

Even if you never use the animated covers, it'll still save you a small fortune compared to hiring designers every month.

Overall I was really impressed with this tool and think it's a game changer for anyone selling digital products. eCoverly just made my must-have list!
