Start writing your abstract here. It should give a clear, concise overview of your presentation — covering the research problem, the methods applied, and the key findings and conclusions. The entire abstract must be formatted in times new roman, size 10, single-spaced, and justified. Any abbreviation should be spelled out in full the first time it appears, with the short form given in parentheses immediately after. Write numbers as numerals, except when they begin a sentence. Submissions must be a microsoft word (.docx) file and must not exceed 250 words. Using this document as your template is recommended, since it already follows the required formatting and styles. **References or citations should not be included in the abstract, and a separate references section is not permitted.**

Keywords: Keyword1; Keyword2; Keyword3; Keyword4; Keyword5
Provide 2 to 5 keywords. Use capital letters at the beginning of each keyword. Each keyword must be separated with semicolon (;) and do not use a period (.) at the end.

Note: Please do not change page margins or adjust other formatting.
