

Course Description:

Apparels is a foundational course that prepares individuals to analyze the social, psychological, and physiological aspects of clothing and textiles. Focus is on the individual's own fashion awareness for personal selection, care, maintenance, and construction of their clothing needs. Included are: the nature, acquisition, and use of clothing and textile products; consumer and career information relative to the personal collection, design, construction and maintenance of clothing and textile products; and the effect of consumer choices on the individual and family. Career education and Family, Career and Community Leaders of America (FCCLA) student leadership are expected to be an integral part of the course.

Family, Career and Community Leaders of America, FCCLA, is a youth organization for young men and women enrolled in Family and Consumer Sciences. The objective of the organization is to promote personal growth, character development, career readiness, and leadership opportunities. FCCLA will be incorporated into the Adult Living curriculum.
