Summary:

Shinsei Galverse is a collection of 8,888 Gals by TeamGalverse. Galverse is inspired by nostalgic showa-era anime, and was created in April 2022. Galverse has the motto, “WAGMAA”, which stands for “We’re gonna make an anime together”. The vision is simple, to be the first Web3 NFT Community to launch an anime.

Galverse holders will help direct the development of the anime, character design, story, and more. One of many anime projects on Ethereum, Galverse sets itself apart with its unique art style and project goals. There are 3,891 current holders of Shinsei Galverse, and Galverse recently added Steve Aoki to their long list of influential holders.

Fungibility: How exchangeable is the asset?

At the moment, the floor price is hovering around 0.08e and only 4% are listed on OpenSea. There is a fair amount of activity on NFTX, which shows market participants are actively trading the assets.

Utility: How useful are these assets?

As a Galverse holder, you are able to direct the development of the Galverse anime, character design, story, and more. Holders will work with the team to pitch Shinsei Galverse to major studios and turn the Galverse anime into a reality. Holders can hang out with the team in the exclusive Galverse Community Space, where they can discuss the roadmap. Holders are granted access to the “Your Stuff” page where they can download awesome art assets featuring their Gal. There are Galverse social templates such as banners, icons, and PFPs in the works. The roadmap also states airdrops will be frequent, as well as collaborations with different artists. Holders also have access to the official Galverse manga One-shot on the Galverse website.

Durability: How culturally valuable is the asset?

Galverse plans to make an anime, which will last for years to come. Fans of anime and manga alike will cherish Galverse for both its art and the anime/manga associated with it. NFTs are becoming more story-centric, which makes Galverse the perfect fit for those interested in story-telling NFTs.
