

I am going to be talking about Why Roblox doesn't Care and why Roblox ruins it and get worse. And how they use to care from old days

I wanted to get started making an document about Why roblox makes it worse, and how roblox doesn't care about the community

Roblox has been making the game worse and how the engine is so bad like the physics or old physics that are glitchy. Now you're exploring some old games and the physics are buggy and glitchy? Let's just say it's the engine that is being upgraded and it's getting worse.

Roblox scripts. Now The only thing that roblox changes scripts since 2012 because their updates, to break old scripts. Something like that because I saw a video because I don't know if they break old scripts because the 2012 client is like old. Because all I know is roblox is breaking old scripts since 2014 because they added filtered enabled to stop the exploiters while exploiting every game now all I do is just play the game because I joined roblox since 2013 and I still play roblox in 2014 as guest because my first 2013 account was hacked. Anyways Roblox should've added anti exploits or anti cheats to Stop exploiters on every game such as FE games or FD games (FD stands for Filtered Disabled and it's not about filter chats for god sakes. It's about like Old games and scripts which is Non FE)

Online Daters on Old Roblox. Yes there are Online Daters because first of all "There were no toxic people, online daters, and slenders etc." Ok they are toxic people, and online daters Why? Because you might know that Albert used to online date back in 2008 when he had a crush (cringe for what he did. Sorry Albert) I don't know if there are online daters from 2007 but they used to have Online daters back in 2007. And sometimes it might be bad but 2007 and 2008 might be fine but they think it's bad.

2009 Roblox was a rough year for these players because it was a bad year for the community since 2009. It is toxic, there's use to be emos when all these players might be emos, and online daters, yes they do have emos in 2009 well sometimes in 2008. Popular games or something from 2009 that people would hate because they wanted to play their favorite or let everyone to play their game when they created because people think Roblox is Greedy.

In 2007 Roblox was going to updated the New Character that looks ugly and it looks like this

here is the link for

this <https://blog.roblox.com/2007/05/more-character-visuals/>

(And yes It went to another page when I was going to put the Image in)

This looks ugly right? Well it kinda does, The whole community don't like the character style because they think it's not what roblox should be. Kinda agree and why do I agree? Because Roblox is supposed to be a game that is a blocky game and your character is like a blocky style (I am sorry for the grammar I couldn't know what I was typing like that)

2010 Roblox added bc only games because the update was terrible, I remember seeing bc only games because it's stupid how roblox added in since 2010 people are saying the roblox is greedy (because they are greedy and they need to do it better) and Roblox added bc only games because it's p2p. If you don't know what p2p is? It is Pay 2 Play like from tf2 and you want to buy some weapons and you have to pay to buy a weapon. If you want to get it free you can play it on servers but what's strange is you have to buy to play on the server On Team Fortress 2 since 2010, Now you can play any servers for Free all you want. Anyways Roblox didn't listen to the community cause they didn't want to remove the bc only and people hated roblox. Since 2011 XiaoXiaoMan made a video about Sword Fights On The Heights IV now bc only and reactions about bc only, here is the link

<https://www.youtube.com/watch?v=PEXhUg2ni08>

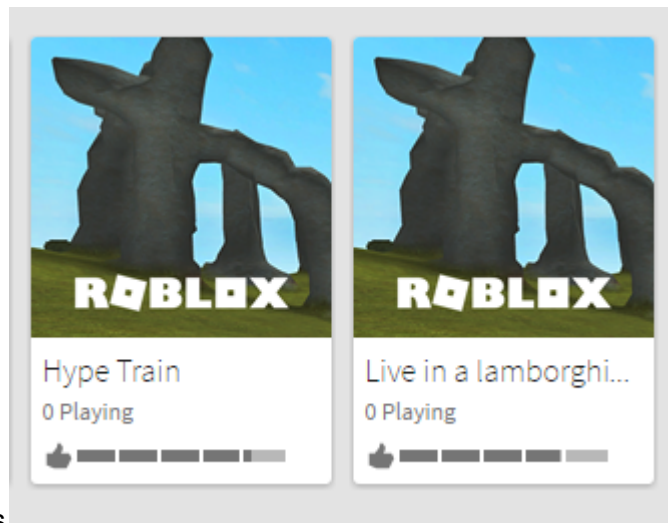

<https://www.youtube.com/watch?v=8Og-gpVkQ8c>

<https://www.youtube.com/watch?v=8YNDHyLtscQ>

In 2019, Since roblox changed Builders Club to Premium? Bc only games and items are gone and it is good how bc only things are gone and great (I also forgot that they use to have bc only in items)

2017 Roblox made the worst things that everybody hates, such as “Anthros”, lots of scam bots but good thing is roblox banned scam bots and still getting worse from 2018 and current roblox now but I think these scam bots are dead for now on.

So anyways when roblox was going to release anthros because people don't like the update and how ugly it looks. I do remember when roblox is going to release anthros but it makes no sense. Why does roblox have to make things worse? It's just bullcrap that is not going to be roblox anymore because it's not what roblox should be and again like I said? Roblox is a blocky game, that's all. And the server list update and how terrible it is. I hated the update because you can't go at the end like next or last something like previous or next but that's what they do, they wanted to go an a different server because the game is hacked or toxic people in the server but for god sake Roblox is getting worse and then didn't bring it back because the whole community ranted or hating about the server list update and here is the video when cowcow made a video about “ROBLOX IN 2017 - THE GOOD AND THE BAD” Talks about everything and I want to talk about all random games or old games don't show a game thumbnail because I do remember that back in 2017 and I don't like it. How are you going to see a game like if it's

original but we can't see all you see is this

that's what it's like and you can also watch this when epikrika use to make this and talks about everything (yes epikrika made about that too) it is "2017: Year in Review [ROBLOX Discussion]" And it was good like everything that roblox did? Is worse. Roblox has gone downhill and made money because roblox is a POS... They also added Experimental Mode and to annoy players that gets frustrated because they are trying to make a game and let everyone to play some random games that are Free Models or Old but Wtf is roblox doing just to fuck up old games and random games that has free models to break the script. Things have gotten worse once again, Roblox is still bad just for the hell of it... Changing the logo in early 2017 People hated the logo because it looks like an freaking cheezit Like bro, Can you imagine when roblox changed their logo and it looks like cheezit? You know what reminds me of the fonts logo since roblox updated? It was from American Dad and the episode was "Tearjerker" and you'll see the fonts in the intro which I will show you is here <https://www.youtube.com/watch?v=IOXHX0u5L5c>

(skip to 0:18) or this...

Man I think roblox should bring the old logo back maybe just 2015 Roblox logo make just remake em. Like roblox would get sued by seth macfarlane for using the fonts since 2017 Like at least keep the logo 2015 because that's what roblox is.

2018 Was the worst year ever

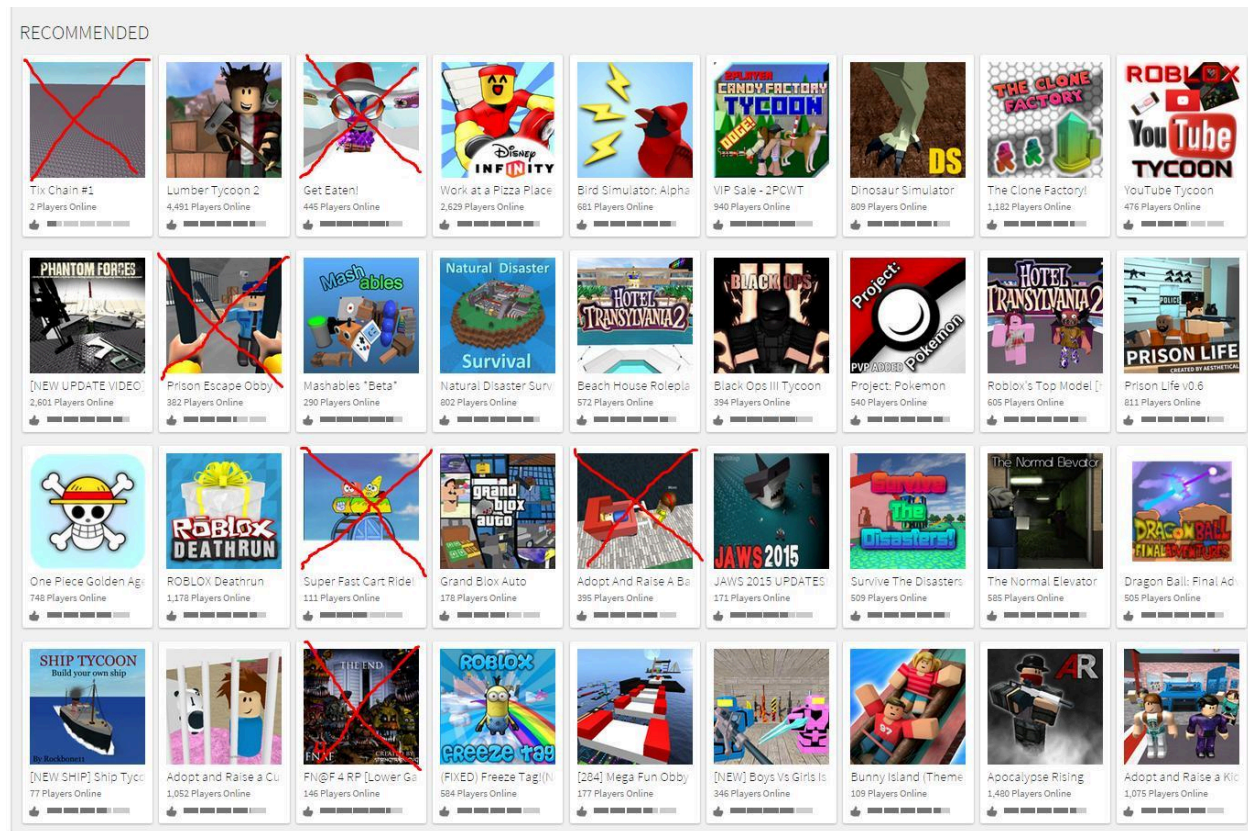

Trash Updates like Experimental Mode and we can't play Old games or Random games because theres a news about a 7 year old girl avatar gang raped by an Exploiter

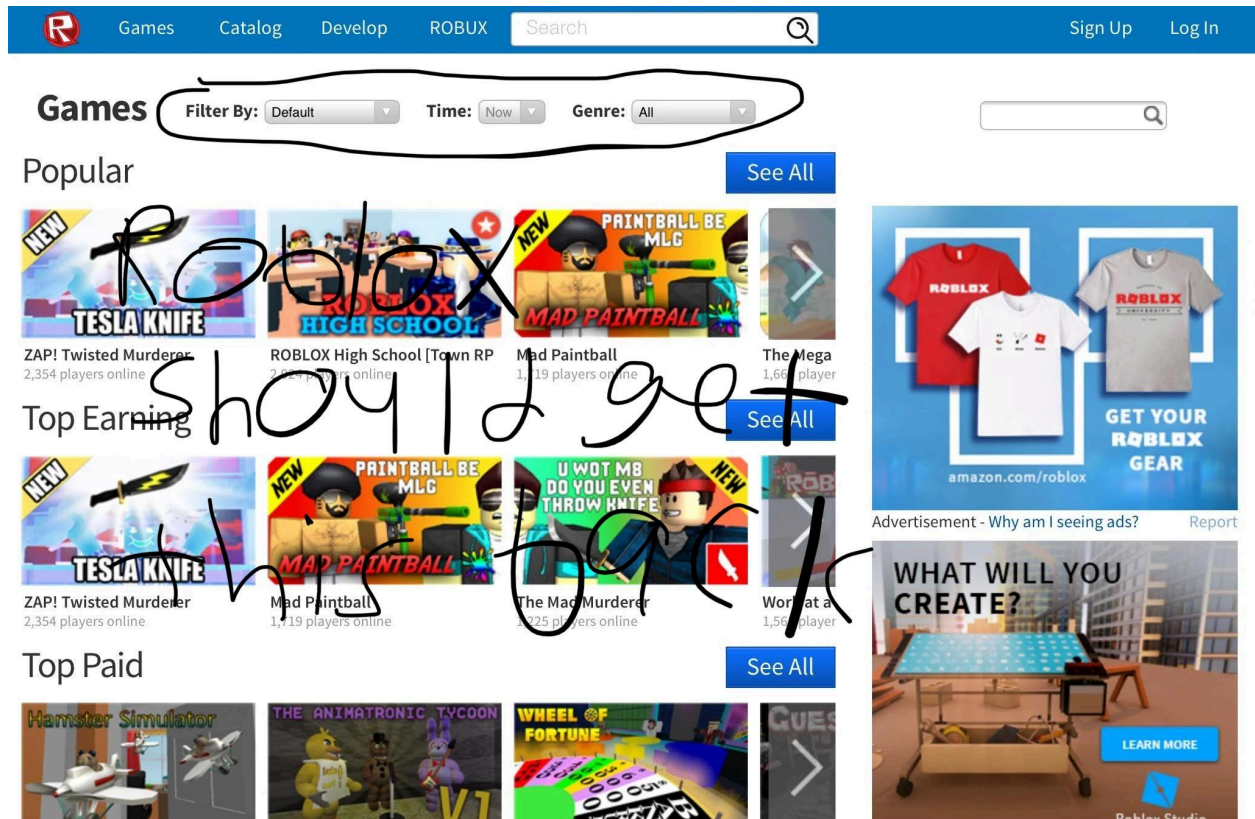

<https://www.youtube.com/watch?v=zGfflwCF1F0>

And it's annoying that there are too many exploiters and then roblox is going to force all games to FE and what they did to stop the exploiters which is good but bad thing is we can't play old games but you can convert, but I don't want to convert. It's hard, we can't convert other old tools and scripts because it's pointless to do but you can. I use to convert script and fix something but I didn't know what to do

This is why roblox should've added anti cheats not forcing all games to FE roblox is going to make it worse because we can't play non fe games or filtered disabled games it's bs. Like just add anti cheats or anti exploits but roblox should get Filtered Disabled back but I know they won't but, games is for everyone or everybody to play any games like non fe games or fe games modern games but it gets worse and worse. What's boring is roblox added rhtros and I don't like the update. And it's unfunny than the current day, I know they will say "So what people use rhtros and you're complaining" well yes I am complaining but I don't wanna complain that much. I mean rhtros is not like a blocky thingy I mean it has faces that you can put any faces you want but they're cringe and unfunny.

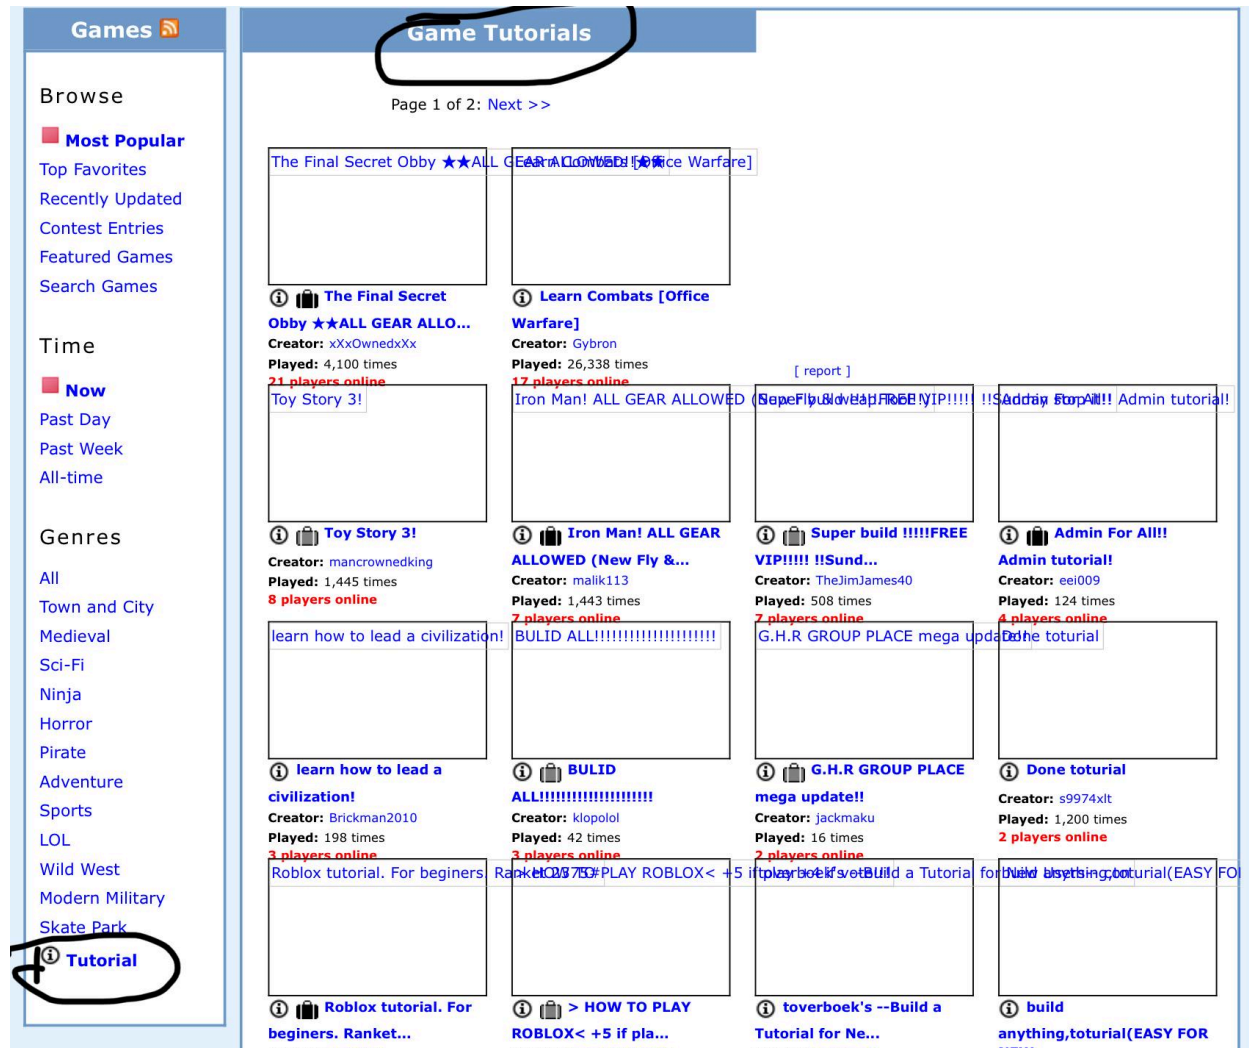

And I still forgot about 2017 that roblox removed genres and the worst thing in 2015 games page layout. It sucks because you can't put any numbers at the end or click all the way at the end about what game they wanna play, something like old or not popular games but it's annoying. This is what it looks like

Like I said they use to have Next or Previous button and this is an image so I scale it down to show y'all sorry how dark it looks like

In 2010 Roblox use to have “Game Tutorial”

To teach new players how to make games and scripting and that's good teaching players how to make games and since late 2013 or 2014 roblox removed “Tutorials” Genres.

2016 Roblox removed Tix to Avoid Scam Bots. And again from 2017 forums is gone and roblox will not bring it back

In 2019 Roblox changed their new logo and roblox removed the shift lock ui because when they got their shift lock on and when they are trying to run while playing prison life? They would say “I can’t run, man it doesn’t work” All they had to do is to turn off the shift lock and test to see if it can run and it does. Some random videos to show y’all what it’s like but I will show y’all the old shift lock ui thingy

and read everything and you guys will read this.

this is early 2011 shift lock ui

Mid 2011 shift lock ui

And last but not least late 2014 ui

The screenshot from the video is the 2015 shift lock ui but the video is from 2016 lol

Well I'll keep y'all updated. Hope y'all enjoy my Documents

Maybe I don't have to
Personal Server

Terrain exist since 2011 that people use to
hate but they think that Roblox isn't supposed

to have terrain it's something a blocky game and it has materials something like that what they would say since 2011

In my conclusion

Roblox should listen to the community.

Roblox has do it better because they are making money and they do just to make everything, the moderations just gets worse because when they say like "hi" or "hello" they get banned a dumb moderation. It makes no sense, roblox needs to fix everything and listen to the community how bad and horrible it is

Roblox should just bring everything back and get the old logo back. I mean you made it into silver like you did with a 2017 logo. So yeah and fix old scripts or every scripts that needs to be fixed. Atleast get late 2013 and fix the physics like playing cart ride or old cars and

the old physics and the physics are glitchy and buggy that roblox need to fix the engine and fix avatar texture glitch when it loads your avatar it is annoying but funny? Roblox should make everything better and do their best not just do what they wanna do.

Thank you guys for reading everything and sharing it to all the roblox twitter community that I did everything.

And roblox, You should stop making things worse because all you do is to remove something to make it worse, people don't like the update and all you do is make things worse and you're making no sense man. You need to listen to the whole community and make it better. You should've do it what you do, listen to all these youtubers and you should bring it back. I know you're making it well but it's not. Also The homepage updated

when they already made the video about that and you didn't bring it back? We just don't like when you remove things. I hope you make everything better, you can still make it realistic but you make things worse. I hope you see this and all of them? And I wish you were the best.

Goodbye!

And I am sorry for the Grammars I apologize

Update: I forgot to mention about the Mobile version and use to have bugs because roblox need to fix and people would hate the roblox mobile update because first of all, when you open the app and you see the skybox and now it loads in homepage like when you open the app and it you see a skybox that look like you're in the game? Man, the new roblox mobile is bad. I don't wanna talk about the old

first mobile version from 2012, I mean atleast just keep the style like from 2018 because I like the style that looks like a desktop style and you can go to friends list but I want to try on in desktop mode style and the only thing I like about the avatar editor is like a closet style and it's like this

Why does it have to be gray and black? So horrible but I'm sorry! It's my opinion :/

The chat thingy in game how annoying and bad it is. Let me tell you how bad it was and how it annoys me, when I put "Roblox is trying to make things worse" and When I press enter it's like "Roblox is trying to make"

Like roblox need to fix the chat because it's buggy. Roblox is just sad making things worse and make money off of it and for god sake don't even get me started about the old bubble chat because first of all, roblox didn't fix the old bubble chat because it's buggy and glitchy. Why? Because when they made a video about the old bubble chat isn't showing or it's glitchy? Here's a video that cowcow made a video on this in 2 years like

2020 <https://www.youtube.com/watch?v=mZOgFZqR2IU>

This is why the old bubble chat is broken and glitchy. The new bubble chat is fine (I don't like the new bubble chat from 2020 but it's a

script so yeah) And roblox haven't listen to the community but the game engine sucks so bad because the old scripts is breaking, physics or old physics are glitchy and broken because how terrible it is, the hopperbin tools like the "run" or "fly" old 2008 tools etc.

That doesn't work. Roblox is a corporated game and I hate how the game is being corporated because how bs it is. The bypass clothing it gets worse, the moderation sucks because they didn't banned it and the decals too and t-shirt. You need to get it right man. Because roblox has truly gone downhill like crazy and uncanny it is. And speaking of uncanny? Hmm I know they'll get mad or upset when I talk about "rhtros" (Idk if they will get mad but sorry y'all it's my opinion) When rhtros exist since 2018 and we don't like it right? It's cringe and unfunny. Because now in 2022 Roblox was going to remove

classic avatars (which is dumb because roblox is missing the point) I don't understand why roblox is removing classic avatars but the classic avatars is still here. Removing R6? Man roblox doesn't even care about classic things, all they care is money, new style but keeping r15 well roblox was going to remove r15 but it's still dumb to remove things.

Roblox is about a blocky game since 2006 and all our characters is blocky and classic not like some human looking character and weird avatars. Wth is this uncanny roblox? Hell roblox? Corporate hell uncanny roblox? Bs it is!

Roblox should do it better back in the old days and I know roblox will not bring it back, but roblox needs to listen.

I'm done!
