

Mobilizing action to restore funding for TB programs

Social Media Toolkit

Purpose

To raise awareness about the detrimental impacts of stop-work orders and funding freezes for tuberculosis (TB) projects globally, highlighting the ethical concerns of halting clinical trials and TB services, and calling on the US and global donors to restore funding.

Target audience

- US/Trump administration
- Policymakers in TB countries
- Other country donors and funders for TB and global health
- Multilateral partnerships
- Global health advocates and civil society organizations
- Researchers and healthcare workers
- General public

Key messages

- Over 80% of people with and dying of TB are in low- and middle-income countries ([WHO TB](#)), meaning those living in LMICs are most impacted by a withdrawal of aid. Stop work orders are an injustice causing severe harm!
- Due to the stop work order, clinical trials led by USAID's research partners have been interrupted and new enrollments halted. Not only is this medically unethical, and puts participants at risk of drug resistance and death, but also undermines global TB control efforts.
- While US funded projects are disrupted, there is a risk of 11 thousand people with TB not completing their treatment each day!
- Airborne bacteria like TB do not know any borders - TB anywhere is TB everywhere, and TB is indeed everywhere! Without urgent action, we risk an increase in TB, drug resistance, and preventable deaths. The US is also not immune from disease outbreaks as has been seen in the recent case of a TB outbreak in Kansas.
- As the largest bilateral TB donor, USAID has invested over \$4.7 billion to combat TB since 2000 and has contributed to saving more than 79 million lives. Even prior to the abrupt withdrawal of US funding, at the current levels of global investment, it is estimated that 43 million people would develop TB by 2030, resulting in 6.6 million lives lost and a global economic burden of USD \$1 trillion ([Stop TB Global Plan](#)) Without US funding, these figures of preventable deaths and costs will substantially increase.

- The US and global donors must restore funding to prevent losing decades of progress.

Calls to action

 **Speak Up!** Use your voice on social media to raise awareness about the devastating impact of stop-work orders on TB programs. Share posts, tag policymakers, and demand urgent action!

 **Spread the Facts!** Misinformation can cost lives. Use the graphics and key message in this toolkit to educate your network and counter harmful narratives.

 **Contact Leaders.** Email, call, or tweet at government officials and global health funders to reverse funding cuts before more lives are lost. Or use this [letter template to reach out to the US ambassador in your country](#) demanding restoration of funding and urgent attention to TB.

 **Support frontline TB organizations and initiatives.** Donate to organizations hit by the funding freeze through ["Keep the Lights On"](#) via the UN Foundation STOP TB Partnership. 100% of the donations will go to these [114 organizations](#) in 38 countries.

 **Share your expertise.** [Sign up](#) to volunteer your skills for communications, data analysis, and advocacy campaigns with the TB Community Coordination Hub.

 **Become a spokesperson.** If you feel comfortable, [consider signing up as a spokesperson or source of information](#) for your community or country. We require strong voices to demonstrate the tangible impact of the funding freeze and provide global representation for the TB community. Your identity can remain anonymous, and we will connect you to media representatives for interviews and statements.

 **Take Action NOW!** Visit <https://www.tbcommunitycoordinationhub.com/> for more details and resources.

Let's raise our voices and ensure TB programs continue to save lives.

TB IN CRISIS OUR SURVEY REVEALS

180 SURVEY RESPONDENTS
31 COUNTRIES

These are the **voices of frontline heroes** - clinicians, TB champions, community health workers, and civil society leaders.

Their message is clear.
People are being left behind.
The TB fight is in crisis.

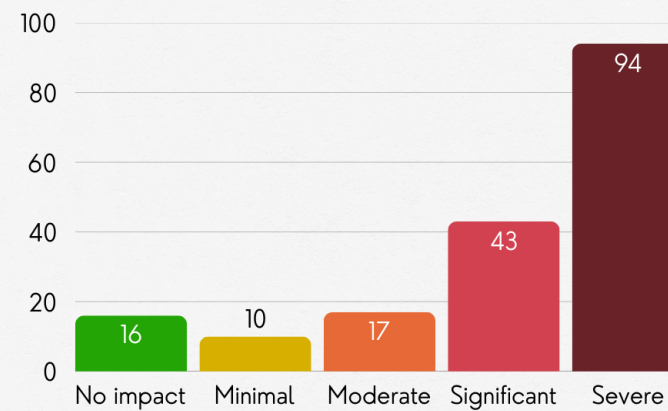

IMPACT OF U.S. FUNDING CUTS

50% SEVERLY IMPACTED
capacity to deliver TB services

25% CLOSED OFFICES &
PROJECTS

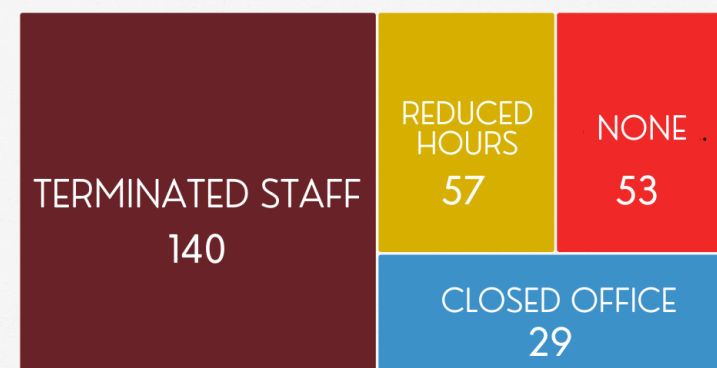

STAFF LAYOFFS

78% reported staff layoffs and furloughs of clinical and community staff

16% reported they have closed their office

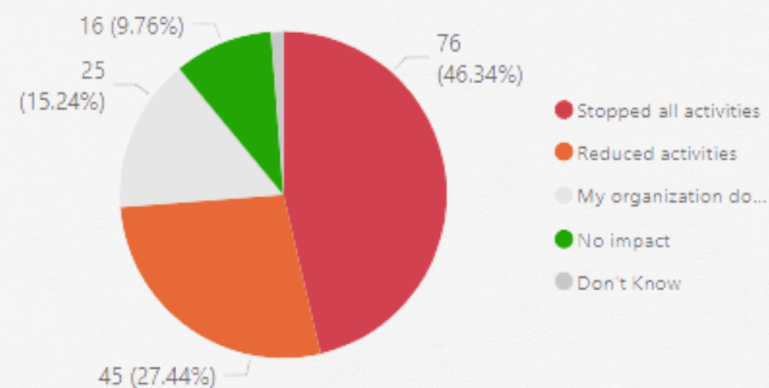

THIS MEANS WE CAN **NO LONGER ENSURE**
TIMELY DIAGNOSIS AND TREATMENT FOR
PEOPLE WITH TB

TB SCREENING AND OUTREACH

46% STOPPED **37%** SUBSTANTIALLY
SCALED DOWN

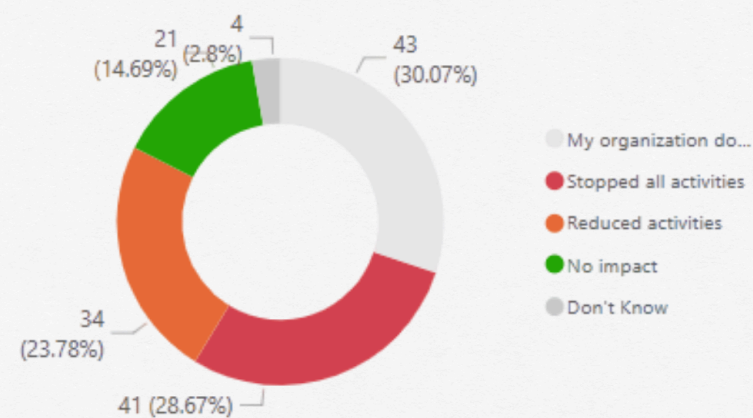

THIS MEANS WE WILL SEE AN **INCREASE IN THE
NO. OF CASES** WITH UNDIAGNOSED AND
UNTREATED TB

TB TREATMENT INITIATION IMPACT

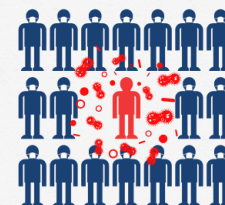

29% STOPPED + 24% REDUCED

**LOSING ACCESS TO ESSENTIAL MEDICATIONS
WILL INCREASE TB TRANSMISSION AND
DRUG-RESISTANT FORMS OF TB**

THIS IS HOW
AN **EPIDEMIC** GROWS!

WE ARE LETTING THE **DEADLIEST**
INFECTIOUS DISEASE THAT **KILLS**
1.5 MILLION PEOPLE A YEAR ONLY
GET WORSE!

THIS WILL AFFECT EVERYONE
GLOBALLY, INCLUDING THE
UNITED STATES OF AMERICA.

#WeWillNotWalkAway

THE U.S. GOVERNMENT HAS CHOSEN
TO DEFUND **LIFESAVING AND
PREVENTIVE TB CARE.**

CIVIL SOCIETY IS FIGHTING BACK,
BUT THEY NEED SUPPORT.

STAND WITH US. DEMAND ACTION.

PARTICIPATE IN OUR
CALLS TO ACTION.

2. This is a global health emergency. Suspending tuberculosis (TB) programs means stopping life-saving services including testing, treatment, prevention and research. It is unethical to abandon millions of people affected with TB without support. We call on the US administration to urgently restore TB funding and prevent a catastrophic resurgence of this deadly disease.

#EndTB #FundTBNow #YesWeCanEndTB

**THE WORLD CANNOT
AFFORD TO TURN
ITS BACK ON TB!**

3.

TB is airborne and knows no borders. The disruption of the U.S. funded TB programs threatens to accelerate the spread of TB and its drug-resistant forms worldwide. The recent outbreak in Kansas is a warning: TB anywhere is TB everywhere. Global health security depends on continued investment in TB prevention, testing, treatment, and research. We must act now to restore funding and stop this crisis before it escalates further.
