

Dual Enrollment Classes

Professor Video List Request

Greetings,

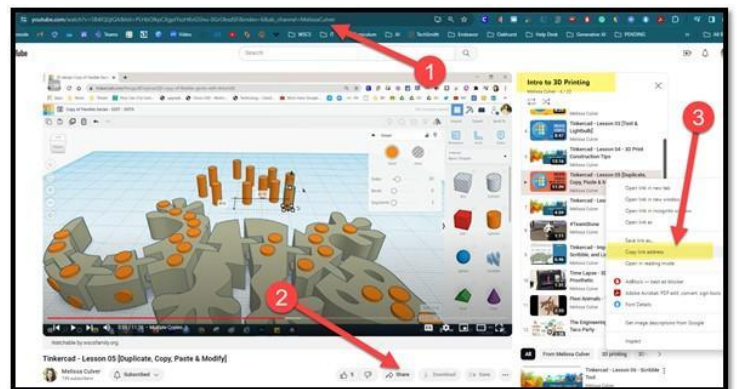

If you use a school-provided device, several YouTube videos will be blocked. To watch the content housed in Canvas or Blackboard [for example], we would need to approve each video. The videos in question are tools loaded by the professor. We would need a complete list of the video content supplied by each professor/ instructor. We would then approve each video individually.

The URL's hosted at the top of each page for the learner to see are unique to the Canvas/Blackboard landing page or user portal. The video that is pulled from Vimeo, YouTube, Rumble, etc is a separate link altogether [the learners typically don't see these links as the content is embedded in the learning platform]. For us to approve the video content, we would need to allow each individual URL for each video.

Please reach out to the professors/instructors for these video links, we would need URL #2 and not URL #1. [One more item below.]

Additionally, if the link comes from a playlist, that URL might not work. Again, the original URL found in the share space of the video is the link that we will need.

Your professor should hopefully email that list to you. Once you have that list, please forward the information to Mrs. Culver. Our IT Department will then process that request.

Please email the video list to:

Mrs. Melissa Culver
