

Earthquake Safety Tips

DOs:

- **Stay calm** and help others stay calm.
- Move near the **green-circled pillars/columns and take shelter**
- Remember: **Drop, Cover, Hold On**
 - **Drop** to the ground.
 - **Cover** under a strong desk or table.
 - **Hold on** until the shaking stops
- Stay away from windows, glass, heavy furniture, and hanging objects.
- After the shaking stops and things feel stable:
 - **Use the stairs only** (do not use lifts or escalators).
 - Go to the **assembly points**:
 - The football field
 - The biotope open areas
- Stay in open areas and keep a safe distance from buildings.

DON'Ts:

- Don't **rush or panic**.
- Don't **run outside while the ground is still shaking**—you may get hurt.
- Don't use **elevators, escalators** or **stairs** during or just after the earthquake.
- Don't stand near **windows, glass doors, or objects that can fall**.
- Don't ignore safety instructions from university staff or security.
