

RnR Chap 4

A. Create a list of the years from the last 2 decades (1990's,2000's and today) during which there was:

1. El Nino event
2. La Nina

B. For each of those years listed describe the associated impact for a specific place in North America. Be specific in the type of impact and how it is measured.

C. Compare what has happened in North America during these events with what happened in South America during the same time period. Make the same comparison between what was happening on Africa, Australia or South East Asia and North America.

D. Research the techniques and technologies being used to monitor El Nino and La Nina Events.

- 1.

What data do each of these techniques/ technologies create (units)
