

Instructions:

To Import the Profile properly (As shown above), without compromising your previous TSM Settings, follow the exact procedure in the following steps:

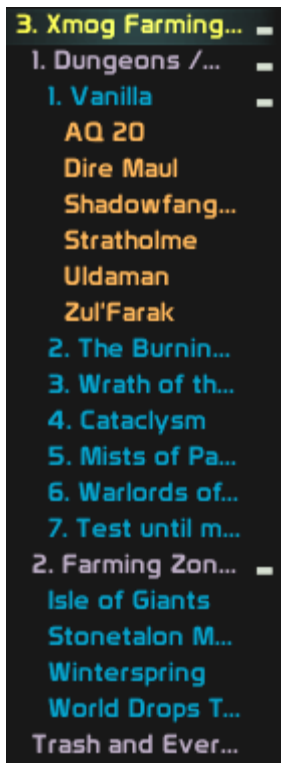

I. The Beginning:

- Make New Profile by going into *Options>Profiles>New* and type the name of your new profile.
- Next go into “TSM Features” on the top of TSM, Click Custom Price Sources Tab, and where it says “Custom Price Source Name”, type “umren” and paste this:
avg(avg(DBMarket, DBGlobalMarketAvg), avg(dbmarket, dbregionmarketavg), avg(DBMinBuyout, dbmarket), DBGlobalSaleAvg, DBRegionSaleAvg)
 press Enter, and walla.. you have my custom price string.

II. How to Import the Groups:

The make the BIG Groups as shown In the picture above following these steps:

- Go into Groups > Click on **Groups** in the left side list
- Create 1 by 1 all the BIG groups marked by Yellow in the image above, by filling in the name in the field “Group Name” in the main window. (example: **Materials**, **Professions**, **Vendors**, **Pets**, **Random Shit**, **Twink 101**, etc..)
- After you made all the big groups, it’s time for pasting and importing.
- Go into the groups 1 by 1, by clicking on them, and going into Import/Export
- Copy the corresponding string from the Pastebin Links below, and paste it into the Import String field, while making sure that “Move Already Grouped Items” is checked.
- Repeat the process for every BIG group you got.

III. Importing the BIG Boi Groups:

I didn't mentioned "Xmog Farming Zones" above as group, because it's VERY VERY big and if I do it on the same method, your Game will crash. We need to use a bit more sensitive method for that one, that will go into even more detailed importing, as followed these steps:

- Make a Group that will be the BIG container for all the following groups, like example I've done "Xmog Farming Zones".
- Click on the New Group and Go into "Management". Under "New Subgroup Name" type "Dungeons / Raids".
- Go again in the previous BIG Group "Xmog blabla", then Management, then under "New Subgroup Name" type "Farming Zones"
- You can repeat the same for another group that I like to keep, which is optional for you if you don't like, called "Trash and Everything". I use this group to dump all the stuffs that I obtain, that are either cheap, or not present in any other group, or just feel like it's trash stuff.
- After you have done that, go for the Pastebin links below and repeat the same process for importing that I've explained in previous section, just use the appropriate links for each group.
- **Important:** If your TSM is crashing when you are trying to import the whole group of, lets say, "Vanilla" under the "Dungeons/Raids" group... then use the smaller groups strings, and make even smaller groups like: "Vanilla", "TBC", "WOTLK", etc.. under the Dungeons / Raids group... to make it easier for your PC to import all those items.

IV. Strings and Links:

1. **Materials:** <https://pastebin.com/9xdsPznq>
2. **Professions:** <https://pastebin.com/NTBrpMCd> (BIG GROUP - If it crashes your TSM to import, make smaller groups like "Alchemy", "Blacksmithing", etc.. and import the below strings separately)

 - 3.1 Dungeons / Raids - <https://pastebin.com/HTWVjheP> (**BIG BIG GROUP**) - **Not Smart to Import Directly :D**
 - 3.1.1 Vanilla: <https://pastebin.com/71pUk3hn> - I've even splitted this "Vanilla" group into smaller ones, because it might causes some crashes on some PC's as well, so split them up as below:

7. **Twink 101:** <https://pastebin.com/Tk8ghHdN>

V. **This is the IMPORTANT PART**, so please read it fully, to avoid losing gold, patience, and other stuff:

1. This profile is **NOT** in its Final Version, and there might be bugs, wrong stuff, etc. I have tested it **ONLY** by myself, I found no errors yet, but as limited as 1 brain it is, there might be certain inconveniences, so please let me know on our [Discord](https://discord.gg/umrentv) (discord.gg/umrentv) if you find some stuffs that are not working properly.
2. **USE IT ON UR OWN RISK** – if something happens, like miss-priced stuffs, things being posted while u didn't wanted to post them, or some things are not being posted in the manner you like... **Make sure to Check which item belongs to which group**, (u can do that by hovering over the item, and having the tooltip setting enabled), and which operation is applied to that group, and what that operation does. If you have questions feel free to ask them on [Discord](https://discord.gg/umrentv).
3. **This Profile was originally not intended to be released**, however, since popular requests, I tweaked it a bit, to be used generally by everyone. **You Will Need** some basic to advanced knowledge of TSM in order to handle some tweaks that/if you might need to do.
4. The initial intention was to release the Beta Version for [Patreon](https://patreon.com/umrentv) family only, until it's polished till final version, but since I don't want anyone to need to pay for anything that I release... I will just give it away to everyone, but unfortunately I won't be able to troubleshoot everyone, or give **tips / tweaks / tricks for profit** with this profile, on general discussion **most of the time**.
5. I will try to answer all the questions that you might have... but **TRY** doesn't guarantee that I will. I always tend to answer your comments and questions on [YouTube](https://www.youtube.com/channel/UC8v33333333333333333333) / [Twitter](https://twitter.com/umrentv) / [Discord](https://discord.gg/umrentv) / [Twitch](https://www.twitch.tv/umrentv), but that doesn't mean I will be able to answer 100% on everyone, so no hard feelings :D

However, I will always answer 100% of your issues in our Weekly [Patreon](#) Discord Sessions, on chat or voice, if you have any... and since this is my Beta / Alpha version of the Profile, I would love to have smaller support group that I will dedicate 100% of attention to issues, fixes, suggestions, advices, etc... so I am able to give more accurate answers, and improve the Profile more efficiently.

6. **READ THIS CAREFULLY:** After you are Done with installing the profile, make sure to head over to **Operations > Mailing** and change my Characters names with your Character Names, accordingly to which profession they have. (Example: Put in Alchemist Operation, the char name that has Alchemy on). **SPELL THE NAMES CORRECTLY.**

If you want to use the Auto-Mailing operations, I will explain how it works in some of our Weekly Discord Sessions. if you want me to.
