

Step	Mac	Windows
1 – Download iMazing	Go to iMazing.com/download and download the macOS version . Drag iMazing into Applications.	Go to iMazing.com/download and download the Windows version . Run the installer and follow prompts.
2 – Install Apple Drivers	Already built into macOS — no extra steps.	Install iTunes for Windows from Apple’s website to get the Apple Mobile Device Support drivers (you don’t have to use iTunes after).
3 – First Connection	Plug in iPhone via USB cable. Tap “ Trust This Computer ” on iPhone and enter passcode.	Plug in iPhone via USB cable. Tap “ Trust This Computer ” on iPhone and enter passcode.
4 – Create First Backup	In iMazing, select your device in left panel → Back Up → Turn on Encrypt Backup → Choose location → Start Backup.	Same steps: Select device → Back Up → Turn on Encrypt Backup → Choose location → Start Backup.
5 – Schedule Automatic Backups	In iMazing menu bar: iMazing → Preferences → Scheduled Backups . Select device, choose Daily or Weekly , enable Wi-Fi if desired.	In iMazing top menu: File → Schedule Backups . Select device, choose Daily or Weekly , enable Wi-Fi if desired.
6 – Export Messages	Select Messages in left panel → Search or filter by date → Export to PDF → Save to compliance folder.	Same process: Messages → Search/filter → Export to PDF → Save to compliance folder.
7 – Retention Tips	Store backups in multiple locations (external drive + cloud). Name folders by year/month for easy retrieval.	Same — store in at least two places and keep folders organized by date.
