

SUPERCURRICULAR GEOGRAPHY - YEAR 9

Instructions

Fancy trying out one of the department's super curricular tasks to support your learning in geography?

Have a go and show this to your class teacher for more achievement points!

P.D.ometer

Extra Hot

1. Create a model of a composite volcano including information about its main features.
2. Design or create a model of an earthquake proof building explaining the features which will help it withstand an earthquake.
3. Create a video tutorial about one of the BRICs countries. Try and include information about why this country is globally significant.
4. Create a model of a coastal landform (headlands and bays/ cave, arch, stack, stump) explaining its main features and formation.
5. Complete a book from the reading section below and write a summary/blurb **about this**.

Hot

1. Write a diary entry from the perspective of someone living in a slum in India.
2. Research a geography career linked to your topic and create a fact file/ presentation about it!
3. Research and create a fact file on a megacity of your choice.
4. Read and discuss a news story which links to your current topic with your family at home!
5. Design a sustainable city, including information about features and design.
6. Research and create a fact file/ presentation about a tectonic event which has recently occurred in the news.
