

Carly Osborne is a lifelong enthusiast and advocate for water resources and their environments. She is a New Haven native and has lived all over the country and abroad pursuing her education and career. She has multiple BS degrees from University of Montana (Missoula, MT) and Potsdam University (Brandenburg, Germany) in Geography and International Field Geosciences and a Master's in Environmental Management from Duke University (Durham, NC) where she was Research Fellow, Science Researcher and Teaching Fellow. Currently pursuing a Master's in Civil Engineering at UMass Amherst (Amherst, MA). She comes to the board after being introduced to the New Haven Ecology Project/Common Ground as a child and has been on the Common Ground board herself since moving back to the area in Fall 2020. An avid hiker, she has been known to pack out trash when encountering it in the wild and leaving the community a better place than when she found it.
