Subject: Student during lunch

Hi Hollee,

Olivia Scott may be coming to see you during lunch today; if you are in your room. I think I have her settled down for now as she was pretty worried about a math quiz she thinks she failed (she has Algebra II with _____). You have her sister this year so she wants to come and see you. I did not deter her from this but think I have a different plan set for her as I don't want to put you on the spot for constant help. But just wanted to give you a heads up in case she comes today.

Thank you!

I talked to her and she is going to start coming in 7th period (I have prep) and work on math that way if she has questions she can ask me and I can help .

Hi Hollee,

Is there any way that SK can work on credit recovery during 6th period tomorrow? She is so close to passing S1 Geometry that she needs all the time she can get!

Please advise!

Thank you!

Hollee-

I have a student who is struggling in G's Geometry, would it be possible for her to try Lab today and see if she would be willing to give up choir for it?

Subject: TC

After discussing the class M105 Contemporary math with N at HHS I really think that this would be the best class for TC next year. He will be a junior and yes he might struggle on the ACT but I think another year of math in a safe environment and learning real life applications will be the best fit for T to get his 3rd year math credit.

What are your two thoughts

Subject: RE: TC

If you would be ok with juniors taking the class I would be happy to add him. Your department was adamant it was senior only even though I disagreed.

I know that is why I think it is important to have a department meeting after talking to N. I think our department has it all wrong. I tried to do it yesterday and R shot me down because he said we couldn't use PLC time to discuss this (whatever) 😊 I discussed this with C T's teacher and he agrees with me 100%. I just don't want it to be a dumping ground I think if the kid is like T (works hard and is going to really struggle without a build in assistance like Math lab) he is perfect for the class.

N absolutely loves the class and said it is the most fun she has ever had so I think it is important to put the right kids in the class and T is that kid

I think you and I are on the same page. If Jaydee is ok I would happy to add T

Hollee-

I sent this message to B and R to try and advocate for the M105 class after I heard a little bit about your departments discussions of it. I think it would be best for kids, but its totally out of my hands. Thanks for your help in trying to get this going at CHS.
