Wisconsin Alternate Academic Achievement Standards

- All students, including students with the most significant cognitive disabilities, deserve and have a right to a quality educational experience. This right includes, to the maximum extent possible, the opportunity to be involved in and meet the same challenging expectations that have been established for all students. To ensure students with the most significant cognitive disabilities have that opportunity, Wisconsin educators collaborated with educators from several other states in the Dynamic Learning Maps Consortium (DLM) to create alternate academic achievement standards called Essential Elements. These alternate academic achievement standards are aligned to the Wisconsin Academic Standards.
 - English Language Arts
 - Mathematics
 - Science
 - Social Studies
