SLP Caseload

TK – 12 (including RtI)*	52	55
EIC/Preschool	40	40

*The District and VUEA agree with SLPs playing a central role in responding to students in need of intervention based on the results of the reading difficulty risk screener (RDRS), mandated by the state. We have an interest in working collaboratively during the 25-26 school year towards adopting a workload model that is inclusive of both SPED caseload and MTSS (non-SPED) interventions.

Average SLP Caseloads are comprised of all students receiving speech services, not just students with speech services designated in an IEP.

When a Speech-Language Pathologist's caseload is within one (1) of the caseload NTE listed above, the District will begin to actively pursue a solution to ensure the caseload remains in compliance with the collective bargaining agreement.
