

Product Hunt Post Template

ReadMe

This is an editable version of the Product Hunt post to make it easy to fill out and share/get feedback on. **If you would like to use it, select 'File' in the top left, and make a copy.**

We suggest making the first draft of your Product Hunt posting, and then sharing with a few people who can give you some feedback on clarity and whether it tells a good story of your product. The better your posting, the more likely you are to get to the product of the day! (I am happy to have a look if you email me: matt@taskablehq.com)
