

Bangla Token (BANGLA)

WHITEPAPER

INTRODUCTION.

BEP-20 Contract Address:

0x57500400df60c38788025068cd1878a5c5ff433e

With the rise of token, digital tokens in Binance Smart Chain (BEP20) have grown a lot. With the huge respect for Bangla, the founder made this token.

With bright thoughts in our mind, we began developing the Bangla Token (BANGLA).

We are building a digital community, Where users can trade digital currencies.

OUR BACKGROUND.

“Rifat” Approached the creation of This community from a unique perspective; he always wanted a system for a community where the holders could control the system.

“Decentralized system is more powerful than centralized system”

We started this project from nothing. As our community is growing day by day we are getting one step closer to our goal.

FUTURE GOAL

In the future, cryptocurrency will be the only Internationally accepted and used currency. We want to take part in this revolutionary system

After minting 30 Billion Bangla Token, We burned more than 25% of total supply, we also sent some portion of the total supply to charities and put rest to pancakeswap.finance and burned the private key. cryptocurrency and blockchain technology continue to develop their force in this Union.

Technology is developing everyday but we're still living with the same currency that was used 1000 years ago, so we are creating a community where users can trade digitally and decentralize. It's just a matter of time until the decentralized system will be known to everyone.

Tokenomics

NAME : Bangla Token

SYMBOL: Bangla

TOTAL SUPPLY: 30 Billion

Burned more than 25%

About 10% of the total supply is sent to charity

Rest is on pancakeswap.finance

**Let's join this project and let everyone know what
Bangla has to offer to the world.**

Thank you, WE SALUTE YOU
