

WHY THIS **UNHEARD OF** FEEDING SYSTEM WILL EXTEND YOUR DOG'S LIFE!

.....and THE **ONE THING** THAT'S DESTROYING IT

If you've been a dog owner for a long time OR if you just got yourself a new furry friend, you need to listen very closely...

In the next 60 seconds, I'm going to tell you how you can **INCREASE YOUR DOG'S LIFESPAN** as early as **TODAY** by **removing this item from your home IMMEDIATELY!**

We hold our fur-babies close to our hearts...from the moment their puppy dog eyes persuaded you that they were going to be family and be there for us no matter what...to the happy memories you will reminisce on long after they've crossed over the rainbow bridge...sometimes those happy memories are followed by regret that we didn't make more....

We've all heard that dogs age differently than we do. Some use a rule of thumb

that 1 year for us is equal to 7 years for our furry friends. Currently, the average lifespan of a dog is 10-13 years. But did

you know that just a century ago, there were dogs reported to be living to the age of their early twenties? In fact, the oldest dog to ever live was an Australian Cattle Dog named Bluey! Can you guess how old? **This remarkable canine passed away at the age of 29! Can you believe that?** A beagle name Butch is the second oldest dog to ever live coming in **at age 28!** Bluey and Butch almost hit their dirty thirties! However, this is not common today..

The truth is.... that dog's are having shorter lifespans overall..and it's potentially because of this **ONE THING that millions of americans have in their household...**

This **ONE THING** is taking years off of man's best friend!! How unfortunate that many people have been tricked by greedy corporations to contribute to the decline of their dog's health.

Today is the day that you will finally have the answer to turn this all around and create years of more joyous memories for you and your dog to have! Today you'll learn how you can **EXTEND YOUR DOG'S LIFESPAN** and potentially **SAVE THEM FROM HEALTH PROBLEMS FOR GOOD** and **SAVE YOUR WALLET FROM EXPENSIVE VET VISITS**. And best of all **SAVE YOUR SANITY** by knowing that you did the most for your best friend.

Dog lovers have notice immediate results from using this method such as: **MORE ENERGY, BETTER MOBILITY**, and a **STRONGER IMMUNE SYSTEM**

But before I reveal this method to you, I want to talk more about the **ONE THING** that you must get out of your household before it causes more damage.

So what is this **ONE THING** that millions like yourself are being tricked by marketing gurus to buy? You wouldn't believe it....**TRADITIONAL SUPERMARKET DOG FOOD!** Yes. That's right. I was shocked too, but then I realized....wait a minute....I don't even know what's in the food I've been feeding to my dog!

I started looking into it more, and studies done by veterinarians, animal behaviorists, dog trainers, and researchers have concluded that 70% of dog people also didn't know! **THATS ABSURD!!!!**

You may be thinking, "No! I know what's in the kibble I'm feeding my dog! - the front of the box says, 'Plump chickens, choice-cut beef, fresh grains and wholesome nutritious meals for your dog'!"

However, through media and advertising, these are the claims that pet food manufacturers **want consumers to believe** when they purchase their products.

Known brands will look for loopholes all day just so they can make the claim that they are offering FRESH and HEALTHY dog food, but I've learned that big corporations will do anything to save a penny here and there! **HOW UNETHICAL!**

These companies sacrifice the integrity of their brand and let manufacturers decide the minimum standards on what's considered fresh and healthy.

Please, take a quick look at this diagram....

It depicts some big DO's and Don'ts of what to feed your dog

Notice the ingredients that we should be watching out for in the right column...

On our left, you will see a brand we all recognize, right? I circled the statement where it says, **“ROASTED CHICKEN, RICE, & VEGETABLE FLAVOR”**

Now, please scroll down to see an image of what the back label has to say about it's ingredients. I've enlarged it and pointed out a few things...

Poultry by-product? What happened to the roasted chicken **we were promised?**

These big brands will advertise ingredients we all recognize on the front, but in the tiny fine print, we get an **EXTRA 40 INGREDIENTS** that most of the population can't pronounce...and I want to talk about one that 's **HIDDEN AMONG THEM**. It's known as

SODIUM SELENITE

Sodium Selenite is very controversial as it is known to be toxic for pets, and they're getting it a couple times a day in most households.

Sodium Selenite is a synthetically produced, inorganic mineral used for the substitution of Selenite, which is very important for healthy cells and thyroid function and is found in high quality food!

Sodium Selenite is often used though because of how inexpensive it is to make. **Just another sickening way these companies are saving money at our expense.**

The truth:
corn
Poultry by-product
Wheat
BHA
Sodium Selenite

INGREDIENTS:

GROUND WHOLE GRAIN CORN, POULTRY BY-PRODUCT MEAL, BREWERS RICE, CORN GLUTEN MEAL, ANIMAL FAT (SOURCE OF OMEGA 6 FATTY ACIDS [PRESERVED WITH BHA/CITRIC ACID]), GROUND WHOLE GRAIN WHEAT, SOYBEAN MEAL, NATURAL FLAVOR, CHICKEN BY-PRODUCT MEAL, BREWERS DRIED YEAST, SALT, FISH OIL ([SOURCE OF DHA] PRESERVED WITH MIXED TOCOPHEROLS), CALCIUM CARBONATE, POTASSIUM CHLORIDE, MONOCALCIUM PHOSPHATE, CHOLINE CHLORIDE, DRIED PEAS, VITAMIN E SUPPLEMENT, ZINC SULFATE, BHA & CITRIC ACID (A PRESERVATIVE), NIACIN, DRIED CARROTS, YELLOW 5, BLUE 2, YELLOW 6, D-CALCIUM PANTOTHENATE (SOURCE OF VITAMIN B5), COPPER SULFATE, RED 40, RIBOFLAVIN SUPPLEMENT (VITAMIN B2), SODIUM SELENITE, PYRIDOXINE HYDROCHLORIDE, POTASSIUM IODIDE, VITAMIN A SUPPLEMENT, THIAMINE MONONITRATE (VITAMIN B1), FOLIC ACID, BIOTIN, VITAMIN D3 SUPPLEMENT, VITAMIN B12 SUPPLEMENT.

When **Sodium Selenite** reaches **high levels** in the body, that's when it becomes **very TOXIC**. Signs of selenite toxicity in your dog will be and not limited to the following: **losing their fur and coat, gastrointestinal disturbance, skin rashes, damages to organs such as kidneys, liver, eyes, and may contribute to onset diabetes.**

With each bite your dog takes of that kibble, the chances of building up high levels of Sodium Selenite can become very high.

SO WHAT DO WE DO TO FIX THIS?

Highly processed dog kibble contains many other synthetic and inorganic minerals, like Sodium Selenite, so it's obvious we got to switch over to less processed food

You might be thinking about switching from **overly-processed** kibble to raw dog food...right? Well let's go down that road and take a look at a few arguments.

**According to the
American Veterinary
Medical Association,
they are discouraging
pet owner's from
using raw dog food**

For example, dogs are at more **RISK** for **SALMONELLA, E.COLI**, and other possible **CONTAMINANTS** when consuming raw dog food.

**The risks Involved
outweigh the very small
benefits raw dog food can
produce.**

Scientists criticise trend for pet food after analysis finds

Bacteria and parasites often found in raw dog and cat products can pose health dangers to pets and their owners, researchers warn

▲ Researchers say there is no evidence of health benefits for dogs and cats from eating raw food. It can cause injuries, growth problems and illness. Photograph: Alamy

The bones found in raw dog food can **CHOKe THEM**, damage their teeth, and it can cause intestinal problems

Not to mention how **expensive** raw dog food is! It can **cost up to \$8 a day** to feed your dog compared to the kibble that costs \$1 a day. You'd think that the more money spent the safer the product, but unfortunately, money can't buy everything.

It seems like we're running out of options of what to feed our precious dogs without spreading disease and choking them to death.....

So if we can't trust big brand commercial names to feed your dog healthy nutritious food...then who can we trust?

We need an option that has **FRESH, ALL NATURAL INGREDIENTS (AKA NOTHING PROCESSED), SAFE TO EAT, CONVENIENT TO GET WHILE NOT BREAKING THE BANK**, and most importantly, has the potential to **SAVE YOUR DOG'S LIFE!!!**

The answer.....

YOU!!!!!!

It's time for **YOU** to save your dog's life! By taking matters into your own hands, there will be:

NO MORE GUESSING GAMES

NO MORE ADDITIVES

Your best friend will be

FASTER and STRONGER,

HAVE HEALTHIER DIGESTION,

And **BETTER SKIN** and **COAT** for all the cuddles you want

And **BEST OF ALL**....The potential to **live into their twenties!** Maybe even **their thirties!** Your dog could become the oldest living dog ever!

THE TOOL that will change you and your dog's life forever is **FINALLY HERE!!!**

With the help of a man named **Ryan Alarid** and his **associate chef**, you can finally get **PEACE OF MIND!**

**AFTER MORE THAN A YEAR OF TESTING
HE FOUND THE ANSWER...**

Recipes that contain 45% or more crude protein from sources like Organic Chicken and Wild Caught Salmon. With wholesome and nutrient rich foods like spinach, parsley, and blueberries.

GMO Free, Low Carb, and with Zero Synthetics.

Nutritionally optimized for your Dog's superior health and longevity.

Ryan shared the recipes with his family vet who validated and confirmed that the recipes would promote happy and energetic health among dogs.

These **REAL FOOD** dog recipes are also so simple to make because they only contain on average 5 natural ingredients! Ingredients that you can actually pronounce, know what they are, and would eat yourself! Ingredients that are **WHOLE FOODS** that are readily available at any supermarket! Ingredients that you already buy for the meals you make for your family!

Finally announcing!

REAL FOOD FOR DOGS COOKBOOK

ZERO SYNTHETICS | REAL INGREDIENTS | DOG OPTIMIZED

Fast. Tasty. Simple.

Your dog deserves the same quality Healthy nutritious meals that you make for yourself and your loved ones! Not to mention! **QUICK AND EASY** meals w/ on average of only 5 ingredients! **REAL** ingredients! **HIGHLY AFFORDABLE!** **NO CANCER CAUSING PRESERVATIVES, ADDICTIVES, or FILLERS.**

100% GMO FREE
OPTIMIZED FOR DOGS
ZERO SYNTHETICS
RICH IN NUTRIENTS
HUMAN GRADE

Payments Protected by  **CLICKBANK®**

You can finally see all the fresh ingredients going into your puppy's tummy!

Finally meals that you and your dog can eat and enjoy together without breaking the bank!
