

EDUHSD

AI Guiding Coalition

Purpose

EDUHSD is forming an *AI Guiding Coalition* to shape the district's approach to Artificial Intelligence. The group will include site representatives from each school, along with classified staff, administrators, parents, community members, students and other tech-savvy educators who bring practical experience and forward-thinking ideas.

The coalition will help set direction, develop thoughtful policy, and create practical strategies that empower students and staff to use AI tools responsibly, creatively, and efficiently.

Objectives

1. Establish Clear and Responsible Use Standards
Develop consistent policies and practices that define appropriate AI use, safeguard student data and privacy, ensure accuracy, and prevent bias, plagiarism, and misuse.
 2. Strengthen Teaching and Learning
Identify ways AI can enhance instructional quality, save teachers time, reduce workload, and improve overall efficiency, helping them focus more on high-impact instruction and student support.
 3. Increase Operational Efficiency
Explore how AI can streamline district operations, automate routine tasks, improve communication and planning, and reduce costs, allowing staff to focus on higher-value priorities.
-

Next Steps

Each principal will recommend the following representatives from their respective school community:

- 1 teacher
- 1 CSEA member
- 1 student
- 1 parent/community member
