Dear Hiring Manager,

I am writing to apply for the software engineering internship position at Google. I am a senior at Stanford University, majoring in Symbolic Systems. I had the pleasure of attending a guest lecture by one of your engineers on campus, which further fueled my interest in joining the innovative and impactful work at Google.

Throughout my academic journey, I have acquired a strong foundation in computer science, artificial intelligence, and human-computer interaction through my coursework. The courses in machine learning, natural language processing, and data structures have provided me with a solid technical background that I believe would be valuable in a software engineering role at Google. During my previous internship experience at Gibber, I collaborated with a team to develop several web applications using Python and JavaScript. I also completed a research project where I utilized machine learning techniques to analyze sentiment in social media data. These experiences have strengthened my problem-solving abilities, attention to detail, and ability to work effectively in a team environment.

I am particularly drawn to Google's mission of organizing the world's information and making it universally accessible and useful. I admire the company's commitment to innovation, cutting-edge technology, and the positive impact it has on millions of users worldwide. The opportunity to work on projects that contribute to Google's mission aligns perfectly with my future aspirations as a software engineer. Moreover, Google's inclusive and diverse work culture is something that resonates deeply with me. I value the opportunity to collaborate with people from diverse backgrounds and perspectives, as it fosters creativity and enhances problem-solving. I am inspired by the positive changes Google has brought to the tech industry, whether it's through its initiatives in sustainability, accessibility, or the development of groundbreaking technologies.

I am excited about the possibility of contributing to Google's team of talented professionals and being part of an organization that pushes boundaries and sets industry standards. I believe that my technical skills, passion for innovation, and strong work ethic make me a suitable candidate for the software engineering internship.

Thank you for considering my application. I look forward to interviewing with you and demonstrating my enthusiasm for contributing to Google's mission.

Sincerely,
Jasmine California
