

Streamable Learning, the leading provider of K-12 interactive livestreams, is proud to offer public and private K-12 schools in the State of New Hampshire a 20% discount to our livestreaming service. The terms and conditions around pricing and piloting are noted below.

Livestreaming Service

During the 2020-2021 academic year, Streamable Learning will host over 600 livestreams covering most major areas of K-12 curriculum. This includes: STEM, Literature, Social Studies, Foreign Language, the Arts, Career and College Readiness, and Computer Sciences.

These programs are led by leading museums, aquariums, science centers, art and history organizations, authors, universities, corporations, and foundations. In New Hampshire, our local content partners include: Mount Washington Observatory and Seacoast Science Center.

Our resources are ideal to supplement in-classroom or remote learning lesson plans.
