

## LinkedIn

The Token Platform makes the implementation of #Blockchain and DLT solutions simple. Based on Free/#OpenSource modules, it can be easily used by any developer and by any blockchain.

Join the TOKEN Platform Launch event to discover how it can help to test, create, and build decentralized and distributed solutions. From there, we can improve the efficiency, transparency, trustworthiness, and privacy of #publicservices.

The event targets CTOs, CIOs, developers, and ICT professionals working in Public Administrations, and it is part of the Token campaign for early adopters.

---

The ultimate goal in #TOKENProject is to develop an experimental ecosystem to enable the adoption of #DLTs and to prove its value via highly replicable #UseCases. TOKEN Blockchain Platform-as-a-Service (#BCPaaS) is developed to offer a developer-friendly set of plug-and-play services and #opensource components for building decentralized apps and services.
