

So you want to flood the world

Welcome dear viewer I see you want to help me flood well you're going to need to check off a few things before you help me on my quest.

NOTE:

- Must be on PC/Steam to join
- Must own terraria/Tmodloader
- Must own a discord/twitch account
- Must be a good egg :D

Items

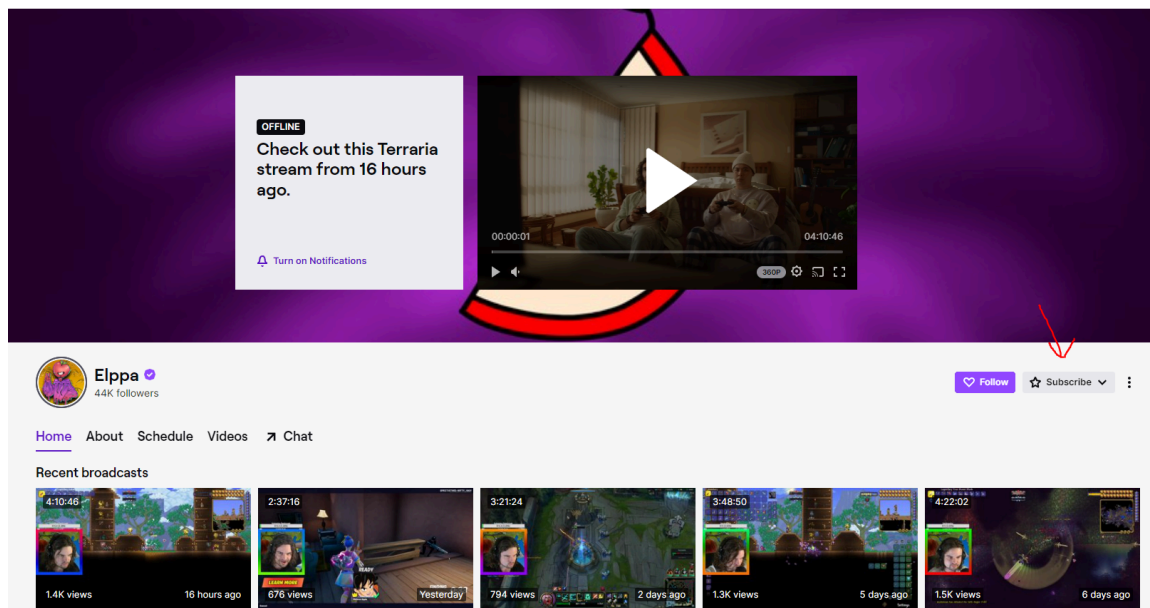

- Snowman Cannon *not the snowball cannon, they are different*
- Wet rockets
- Flying Mount/Wings
- High Defense Armor
- High Damaging minion
- Dungeon bricks

Now how to join

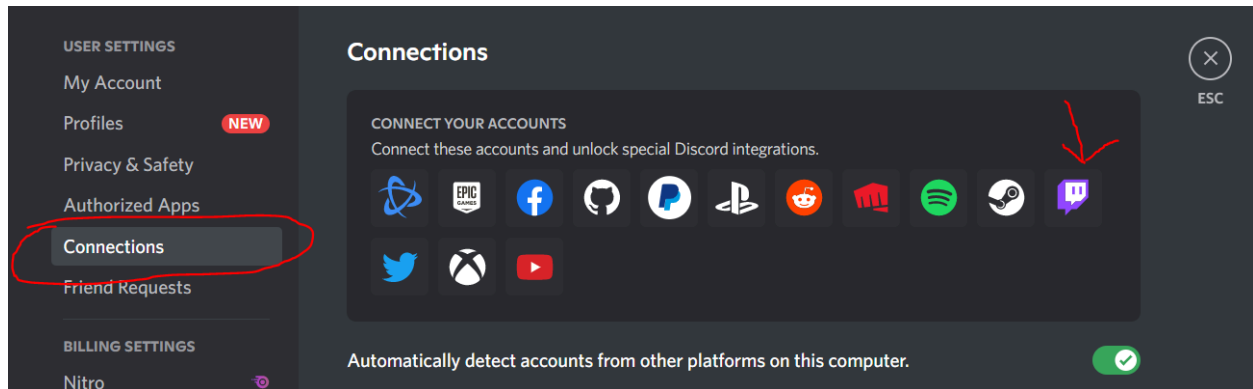

You'll need to first sub on my twitch which can be found here-

<https://www.twitch.tv/elppa>

Subbing Cost \$4.99 USD per month or free if you have twitch prime

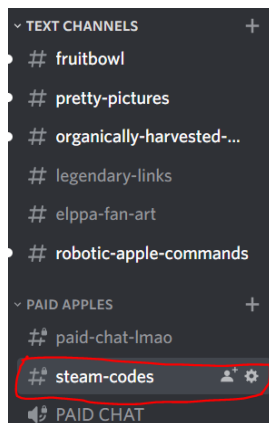

Once Subbed you'll need to join the Discord server and link your subbed twitch account to your discord account that joins the server. You can find this underneath the connections tab <https://discord.com/invite/elppa>

Once done you shall receive a role titled “twitch apples” It normally takes you up to 5 minutes for the account to link. Not me or the mods can give you this role so either you did it wrong or there's a bug that you'll need to contact discord support

<https://support.discord.com/hc/en-us>

When you have the role you should be able to see this text channel

Place your steam friend code here and at 9am AWST each day I'll go through all the codes and add them (Might not be always on time).

You should then be able to join the world and begin the flooding process via steam

NOTE: Only 8 people can be on this world at a time so if it's full just wait until someone leaves.

I'll also be logging on and off this world, when I'm either streaming or copying the world over to my desktop to create that day's episode. I do this at 9am AWST (That day's ep) 6pm AWST (stream) I'll ping everyone in that channel when the world goes back up (Again might not always be on time).

When you join the world, it may look a bit like chaos but go off the left side of the island and just fall until you reach the water, then just use the snowman cannon and wet rockets to do flooding. If you would like to know where I am, try and join **red** team, he might be in **red** team, he might not be, look for the fish head on the map and you should be able to start helping me flood the world

So you want to do building? At the time of writing, the world has Cheat sheet, this means that you can do a whole bunch of stuff and get lots of items easily. When you build, there are no restrictions on what you can build apart from nothing that might get elppa banned on tiktok/youtube (no nudity, porn, etc). You can build anywhere on the map, just don't build somewhere someone else is building. **Please actuate** your build so water can go through it, if you don't, it can get in the way of the flooding. If you would like me to feature it the next day or few, put your build into #paid-chat or into #terraria-builds on Elppa discord server or ask elppa.

Thanks for lending a hand if you are willing it genuinely means alot and lets get this world flooded.

Common questions

Is it terraria or tmod?

It is Tmod, so make a character in tmod, not normal terraria

How do I join?

Read the above, if you still have questions, ping JammySlice#7069 and he will help you

Do I need to install any mods?

Mods will automatically be installed when you join the world, it will also disable any other mods so you cant bring in calamity or other mods

Why is the world not up?

Elppa takes the world down when he is recording todays episode, if it is not episode time, his computer might have crashed, he is sleeping, or something else, just look to see if its up and if it's not, then ask

Are there any rules?

Yes and no, there are no set rules but it is gentlemans rules, don't be a dick, don't destroy builds, don't unflood the world, don't get Elppa banned, don't crash the server, don't be rude to others on the server. If you do decide to be a cum stain, in the worlds of Elppa himself "Its free content"

Rainbow arc/lore?

If you would like to help with rainbow lore, again, DM JammySlice#7069 and we will brainstorm ideas if you would like but please don't just try and destroy nyan cat or paint rainbows everywhere, or continue the rainbow yourself because most likely, it will come, just wait.

Why isn't my build shown in today's episode?

Elppa tries to only show one or so builds in an episode so if it isn't there, it will most likely be in the next one. Also don't just build something and expect elppa to show it, he needs to know it exists and it isn't just on the edge of the map.
