A good indicator of what I deem acceptable is if natural movement is NOT greatly inhibited! ie, if the character can't move appropriately or at all, it's a no go.</p> |

# Da RULES 2025

If something is not listed do please ask, I'm pretty chill with most things but I do have the right to decline/ refuse commissions without explanation.

## Backgrounds

Fair warning backgrounds are not my strongest suit, I prefer nature like scenes such as forests, fields, landscapes, space, cliffs, skies and underwater scenes. Cities depending on complexity I find more difficult, same with vehicles/ machinery. **Background prices will vary**, but should range around 50% the base commission price, if it's more complicated or very defined expect an increase. Simple backgrounds maybe 25% of the base price or less.

Flat, gradients, splatter effects and random textures will have 0 charge.
