What is Aquacity?

Aquacity is a groundbreaking Metaverse project with a unique aquatic theme and innovative play-to-earn models. The team behind Aquacity are young individuals who are driven by a shared vision of providing an entertaining and profitable platform for gamers of all kinds through exciting gameplay activities and unlimited passive income. Offering three distinct versions — 2D, 3D, and Virtual Reality, Aquacity caters to the diverse gaming preferences and technological capabilities of a wide range of players.

Jumpstarting it off for Aquacity is an innovative way to earn cryptocurrency, called **"Dive to Earn"**. It's a mobile-driven blockchain application that lets you earn crypto in the simplest way possible - just by moving around in your daily life! Whether you're walking, driving, traveling, or even on business trips, you can earn rewards without having to invest extra time playing games. As long as you have the habit of moving every day, you can start earning right away!

Dive to Earn is an innovative way to make short or long periods of idle time profitable and enjoyable. With its clear goal of becoming one of the world leaders in mobile driving, D2E has laid the foundation for the global blockchain market share, making it a valuable addition to the Aquacity metaverse.

How to Start Your D2E Journey?

1. Be an Aquacity NFT holder. You must first own an AQUACITY Metaverse character NFT to be eligible to access the D2E App.

2. Acquire an Aquacity NFT Ride (AquaMount) and merge it with the Aquacity character NFT.

3. Complete some simple AQUACITY tasks.

4. After merging these two NFTs, you can now start your D2E journey, immediately and start earning!

What Makes Aquacity Unique?

 Aquacity is a one-of-a-kind platform that offers a unique underwater experience to its users. It combines the latest technology with innovative ideas to create a fully immersive underwater world. Here are some of the key features that make Aquacity stand out:

1. Fully Immersive Underwater Experience

Aquacity offers a fully immersive experience that allows users to explore a virtual underwater world. It uses cutting-edge technology to create a realistic environment that users can interact with.

2. Scalability & Interoperability

Aquacity is designed to be scalable and interoperable, which means it can easily integrate with other blockchain-based platforms. This makes it a versatile platform that can be used for various applications.

3. Decentralized Ecosystem

Aquacity operates on a decentralized ecosystem, which means it's not controlled by a single entity. Instead, it's powered by a network of nodes, which ensures that the platform is secure, transparent, and free from censorship.

4. DAO Governance

Aquacity is governed by a DAO (Decentralized Autonomous Organization), where its users have a say in how the platform is run. This ensures that the platform is governed transparently and democratically.

5. Dive to Earn Mode

Aquacity uses a unique "dive to earn" model, which allows users to earn tokens by performing daily activities on the platform. This incentivizes users to participate actively in the platform and ensures that they're rewarded for their contributions.

6. Inclusive and Dynamic Community

Aquacity has a diverse and dynamic community of users who are passionate about the platform. The community is inclusive and welcoming, which fosters a sense of belonging among its members.

What is Aquacity's digital currency and How Many are there in Circulation?

$AQCT is the Digital Currency of Aquacity Metaverse and is mintable in BNB Chain. The total supply of the token is limited to 100,000,000 and is earned by NFT staking in the Aquacity Metaverse.
