Senior Fullstack Engineer - Juisci

Location: Remote or Paris
Team: Tech & Product
Start date: July
Experience level: 7+ years

At Juisci, we help thousands of healthcare professionals stay up to date with the latest medical research. Our platform uses AI to structure and summarize scientific publications, delivering high-impact insights in seconds.

We're looking for a Senior Fullstack Engineer with a strong product mindset and top-tier TypeScript skills to help us build the next generation of our web and mobile experience.

This is a high-impact role where you'll shape the core user experience for clinicians, researchers, and healthcare teams worldwide.

What you'll do

- Design and build responsive, high-performance web applications using React and TypeScript
- Help create a smooth, mobile-first experience that works seamlessly across devices.
- Collaborate closely with product, design, and AI teams to build features with real user value
- Maintain a high standard of code quality through reviews, testing, and clean architecture
- Take ownership of end-to-end development, from UI to API design in Node.js
- Continuously optimize performance, usability, and accessibility across the app

What we're looking for

- 7+ years of experience in modern web development.
- Deep expertise in **TypeScript** and **React** (including state management, hooks, performance).
- Solid experience with **Node.js**, building and maintaining REST APIs.
- Strong product sensibility: you think in terms of user experience, not just technical specs.
- Comfortable working with **Docker**, **Git**, **Linux**, and cloud environments.
- Familiar with agile development, pull requests, and collaborative engineering practices.

Bonus points

- Experience with React Native or cross-platform mobile development.
- Passion for performance optimization, accessibility, and pixel-perfect design.

- Startup experience or 0 → 1 product building mindset.
- Interest in healthcare, AI, or building for highly engaged professional audiences.

Why join us?

- Build a product that matters for healthcare and science.
- Work with an ambitious, kind, and fast-moving team.
- Lots of ownership and autonomy in shaping the user experience.
- Join a startup with strong traction and a meaningful mission.
