MEETING NOTES: (Feel free to enter notes below throughout the meeting.)

People to add:

Mindy Holland and Kim Trestik + Marr and Mantis HS + Mr. Dilbone

Get to the mohon tech page through the webpage.

As a committee - we need to work on Google Sites - There are a lot of questions converting our old sites and losing the work. We also had questions about whether we can post things on the district website such as linking to a teacher's website.

The instructional tech page can be a great training hub for all those teachers who are looking for resources to better train their students in the skills that they need based on the Tech Scope Maps.

Liesha: "Google Slam" every two weeks.

Tuesday Tech Day

5 minutes or 10 minutes of every Faculty meeting instead of directed planning.

Make videos - share during this time.

Next Steps:

Include more HS staff to help with the 6-12 Scope and Seq.

More representation from the HS departments.

Bigger Pic: How do we roll this out to make sure this is being consistently taught throughout all classrooms.

Try to identify which PD we need to focus our training on - still a work in progress.

Make it sustainable for everyone.

Jason T. - Sharing the whole picture - here's where we're at, here is where we want to go.

We need to prioritize and formulate what everyone needs to do with their direction.
