

EOSC-Hub T5.1 Meeting 20201013

14:00 CEST

<https://indico.egi.eu/event/5254/>

Attendees:

- Nicolas Liampotis (GRNET) **HERE**
- Tim Kreuzer (JUELICH)
- Sander Apweiler (JUELICH)
- Jens Jensen (STFC) **APOLOGIES**
- Mischa Sallé (Nikhef) **APOLOGIES**
- Pavel Weber (KIT)
- Diego Scardaci (EGI Foundation)
- Jouke Roorda (Nikhef)
- DavidG (Nikhef)
- Slavek Licehammer (CESNET) **HERE**
- Michal Prochazka (CESNET)
- Shiraz Memon (JUELICH)
- Marcus Hardt (KIT)
- Andrea Ceccanti (INFN) **APOLOGIES**
- Enrico Vianello (INFN)
- Marcelo Soares (INFN)
- Giacinto Donvito (INFN)
- Johannes Reetz (MPCDF)
- Kathrin Beck (MPCDF)
- Christos Kanellopoulos (GÉANT)
- Licia Florio (GÉANT)
- Yin Chen (EGI) **HERE**
- Uros Stevanovic (KIT)
- Pavel Brousek (CESNET) **HERE**

Agenda

- **EOSC-hub AAI:**
 - Integration activities (see [online version of integration matrix](#))

	EUDAT	EGI	GEANT	INDIGO-IAM
B2ACCESS		EOSCWP5-74	M36 EOSCWP5-225	M36 EOSCWP5-161
Check-in	EOSCWP5-71		M36 EOSCWP5-226	EOSCWP5-160
eduTEAMS	EOSCWP10-119	✓ EOSCWP10-118		M36
INDIGO-IAM	M36 EOSCWP5-224	EOSCWP5-163	M36 EOSCWP5-227	

- Simplified access to resources across infrastructures (see also [[JIRA-71](#)])
 - Skipping email verification
 - Check-in
 - eduTEAMS [DONE]
 - INDIGO-IAM (DEEP hdc) [DONE]
 - B2ACCESS production [PENDING] (tested in the devel/demo instance)
 - INDIGO-IAM [**Action20200901 AC to verify**]
 - Affiliation information
 - Expressing voPersonExternalAffiliation ([AARC-G025 v2](#)) → new OID
 - Check-in - Pending for the community side - DONE on the INFRA side
 - INDIGO-IAM - PENDING
 - Inferring voPersonExternalAffiliation ([AARC-G057](#))
 - *“In case no eduPersonScopedAffiliation is provided by the origin, it may be partially reconstructed according to these guidelines. If there is no reliable way to infer origin affiliation, no such affiliation should be asserted by compliant infrastructure proxies.”*
 - **ALL Provide feedback - to be submitted to AEGIS Oct meeting for endorsement**
 - Adoption of WISE baseline AUP status by B2ACCESS/Check-in [[JIRA-221](#)]
 - Check-in: [PENDING]
 - OpenID Connect/OAuth2 token-based access across different infrastructures:
 - Working document [AARC-G052](#)
 - [**ACTION20200901 NL to organise dedicated call**]
 - Scalable access to infrastructure resources based on Community managed VO/group membership information or capabilities

- **[ACTION20200512]** CK to provide a document describing the approach
 - Training / webinars
 - **[ACTION20200901 NL to provide initial agenda based on feedback collected during EOSC-hub Virtual Week]**
 - Technology-specific offline/prerecorded webinars
 - All-hands interactive webinar including all EOSC-hub AAI service owners
 - **ACTION20200121** [ALL service owners] to provide [documentation](#) for:
 - Pending:
 - End-users
 - eduTEAMS
 - Community managers
 - B2ACCESS
 - eduTEAMS
 - AAI integration support for FNS-Cloud project (see [ticket](#))
- **RCauth** (<https://confluence.egi.eu/display/EOSC/RCauth-Online+CA>)
 - Main tasks that are in progress
 - [RCauth Key Cloning](#) - final key exchange requires datacentre work for STFC & NIKHEF
 - [RCauth deployment](#) - depends on the above
 - [RCauth Database](#) - everything works in tests, albeit with some rubbishness as a Galera/MariaDB node (or cluster) cannot recover without human intervention, even after a clean reboot
 - Not using 3x Primary (3xMaster) replication as we now believe it won't work - 2x Primary did work, though.
 - Agreed last week to have DB production ready by 17 Oct
- **TTS HA deployment**
 - WaTTS - Waiting for new hardware **[ACTION20200901 to check status and provide estimate]**
 - MasterPortal - Verify RCauth HA setup before enabling it for the Check-in instance
- **AOB**
 - Next meeting: **Oct 27th at 14.00 CEST**
