

Vibrant Health Could Be One Prayer Away

The most important piece of [equipment anyone](#) can own is their own body. If that fails, nothing else matters, right?

Health is of vital importance, yet most people don't take it seriously enough. Too many of us make all the [wrong decisions](#)—what to eat, how much exercise to do, and what to drink and how much.

What would you think of the guy who puts [sugar water](#) in his gas tank, maple syrup in his crank case instead of oil and sewer water in their tires instead of air?

Crazy, right? Yet, that's about how crazy some people are taking care of their bodies. But what happens when something out of our [control affects our health](#)? Disease, **accident or assault**—we need all the help we can get to heal from such things.

Prayer can [create miracles](#). But what is a miracle? It's divine intervention that bends or breaks the laws of nature to benefit us.

[The 7 Day Prayer Miracle program](#) can teach you exactly how to do prayer right for precision, powerful results.

Imagine for a moment that you're trying to win an auto race. Instead of a car, you buy a camel. Instead of food, you feed your camel [petroleum—black crude](#). And instead of moving with the other cars, you go in the opposite direction. You'll never win by using the wrong ingredients and doing everything incorrectly.

Prayer is very much like that. Do it all wrong, and you're certain to get results that are not what you expected.

Ordinary care of your own body is like that, too. If you feed yourself nothing but junk food and sit around all day [playing video games](#), your body is going to fall apart on you.

All that pollution and lack of care will stack up, leaving your body ill, tired, fat, and your mind dulled to the point of stupidity. None of us want that. But some of us let it happen anyway. Is it a matter of willpower? Not at all. We have to learn self-discipline, but without critical self-awareness, any attempt at self-discipline is going to fail. Why? Because controlling our direction in life is a matter of having the right [attitudes and feelings](#).

If you don't know what you're feeling, you won't be able to correct your feelings in order to change your direction. It's like driving with thick mud all over your [windshield](#).

And prayer has very little to do with what you say or think. Using only words in prayer is like sitting in the back seat of a car with no driver and trying to "wish" the vehicle in the right direction. Prayer works directly from feelings based on four [key attitudes](#)—the four traits of God which allowed Him to create an entire universe.

Jesus Christ healed hundreds of people nearly 2,000 years ago. Quite often, he told the one who received the gift of good health that it had been their faith that had done it. Why would he say that instead of taking credit for the healing? Humility is a good thing, but lying about the way things work is not. He put responsibility and credit where it was due—[right on the person being healed](#).

We each need to learn the level of confidence Christ inspired in others. Once you know the basics for how it's done, you merely need to follow the steps in the course book to prepare yourself for 7 days of prayer miracles.

Ready to Reclaim Your Good Health?

If doing prayer right were easy, we wouldn't need [spiritual leaders](#) like Christ or Buddha. But learning to do prayer right is something everyone can do.

Yes, it requires work on your part, but aren't you worth it? Don't you owe it to yourself to find the right way to take care of your most **precious piece of equipment**?

And after your illness or injury is healed, taking care of your body becomes easier, because you will have learned what is involved in taking charge of your life.

[Maintaining your health](#) will become as natural as breathing.

When you learn the basics of self-awareness, humility to God and the perfection of fearless confidence—what we call "faith"—prayer produces instant results that fulfill our deepest wishes. **Miracles are ready for you**, and all you need to do is ask.
