Sparknotes

You make gold in maps to hire workers You assign these workers to stations to provide resources or do maps for you which is passive income

U can also take the resources and send shipments for rewards

In this guide i'll go over how to get the most juice out of your kingsmarch

Meta setup imo = Ignore miners and smiths only hire mappers sailors farmers disenchanters

Gold

Item rarity increases the amount of gold you obtain alongside quantity stack enough of both and you can see yourself getting anywhere from 250k-500k a map with a gold strategy!

Workers

Mappers

This is probably the bigger section but i'll summarize it

You want to have high quantity maps as high tier as possible for your mappers

It seems to be worth it to have them constantly run t17s here's some results

```
Abom 30 ea * 7 = 210
sanctuary 22 ea = 22
citadel 20 ea
Ziggara 27 ea * 8 = 216
total = 448c
```

Loot from the above 16 maps

36 Abomination Test

Divine Price = 214 chaos

36 abominations = 1,440 Chaos @ 40c/Map

144 Chisels = 116 Chaos

36 vaal orbs = 18 chaos

total cost = 1,574 Chaos or 7.3 divines cost

Farmers

To be honest I'm unsure of the best crops setup but more often than not i see

1x wheat

1x corn

1x pumpkin

1x orgourd

2x blue zanthimum

Disenchancers

Basically you want to quality and disenchant the best gear here for dust t0s give the most
There's this cool tool I found on reddit for calculating dust.

<https://www.poedust.com/>

The most popular are bino's slaughter knives. Make sure you quality up the gear you're going to disenchant before you disenchant it for dust!!

Shipments

The meta for shipments is Crops and dust!

The breakpoint seems to start around 10 million shipments for way better rewards

30m+ shipments tend to see mirror shards regularly

Don't mix anything into your shipments that isn't crops or dust this will significantly reduce your returns
